Modular Approval Request

FCC ID: UKOUWBTRPHA02

The following attestation addresses the requirements to support modular approval:

Modular approval requirement	Yes (provide brief statement)	No *
(a) The radio elements must have the radio frequency circuitry shielded. Physical components and tuning capacitor(s) may be located external to the shield, but must be on the module assembly	Yes radio part is inside a shielded part. A clock reference oscillator (point 5) is outside the shield. And the signal is shared between the three transceivers. See Points 1-2-3.  Below the board without the shields . In red line there are present the RF IC , capacitors , resistors , inductors , balun filter circuits . 	

		
(b) The module must have buffered modulation/data inputs to ensure that the device will comply with Part 15 requirements with any type of input signal	Yes , only digital communication on logic inputs. No direct modulation ports provided	
(c) The module must contain power supply regulation on the module	Yes, the module integrate a switching step down regulator See point 8 	
(d) The module must contain a permanently attached antenna, or contain a unique antenna connector, and be marketed and operated only with specific antenna(s), per Sections 15.203, 15.204(b), 15.204(c), 15.212(a), 2.929(b)	Yes, The module has 3 transceiver but only one used in transmission. The 3 antennas are soldered on the board See picture below.	

		
(e) The module must demonstrate compliance in a stand-alone configuration	Yes module can work in stand alone configuration	
(f) The module must be labelled with its permanently affixed FCC ID label, or use an electronic display (See KDB Publication 784748 about labelling requirements)	The label is on the top of the module FCC ID UKOUWBTRPHA02. Additional external label is requested on host 	
(g) The module must comply with all specific rules applicable to the transmitter. The grantee must provide comprehensive instructions to explain compliance requirements	Yes , see user manual	
(h) The module must comply with RF exposure requirements	Yes, the module is compliant according RF Exposure requirements	

* Please provide a detailed explanation if the answer is "No."

Sincerely,

Signed:
