A photograph of a disassembled mobile phone, showing the internal components laid out on a blue textured surface. A ruler is placed horizontally below the components for scale. The main circuit board is green and populated with various integrated circuits, including a large black chip labeled 'K31000000' and another labeled 'K31000000'. A small circular battery is connected to the board via red and black wires. The phone's outer casing is visible on the right side, showing a gold-colored edge and a black back cover. The ruler has markings in centimeters and inches, with the word '100' appearing twice.
