

UUMKWM1000 Internal Photos

PCB Top In Housing, with shield installed and tape holding coax connectors.

PCB Top

The image displays three views of a blue printed circuit board (PCB) for a Sony CCD camera. The top view shows a large central square component, likely the CCD sensor, surrounded by various electronic components including resistors (R), capacitors (C), and integrated circuits (IC). The bottom-left view shows the reverse side of the board with numerous surface components. The bottom-right view shows another section of the board with components like the C779, C778, C400, and C401.

PCB Bottom
