## GETTING STARTED

To make configuration changes to your router, open the COR IBR600B administration pages.

1. Connect to the router via Ethernet or WiFi. For WiFi, the default SSID is found on the product label on the bottom of the router.
2. Open a browser and type "**cp/**" or "**192.168.0.1**" and press return/enter.
3. When prompted for the Administrator Password, type the default eight character password found on the product label.
4. Upon log in for the first time, you are automatically directed to the First Time Setup Wizard to configure Admin Password, Time Zone, WiFi Security, APN and WAN failure check.

**For more setup instructions**, see the COR IBR600B Quick Start Guide and User Manual at [cradlepoint.com/ibr600b](http://cradlepoint.com/ibr600b).

## Router Communication / Data Usage

The factory default configuration of the router is set to communicate with Cradlepoint and other resources at regular intervals to access the latest firmware and modem updates, clock synchronization (NTP), and Enterprise Cloud Manager (ECM) membership. Such communication may result in data usage and applicable charges regardless of whether the router uses a wired or wireless Internet connection. To avoid such data usage and potential charges, consult the following Knowledge Base article:

## Deploy and Manage the Intelligent Network with Cradlepoint Enterprise Cloud Manager (ECM)

Cradlepoint's network management and application platform, Enterprise Cloud Manager, integrates cloud management with your Cradlepoint devices to improve productivity, increase reliability, reduce costs, and enhance the intelligence of your network and business operations.
