

Appendix 2

A photograph of a small, green printed circuit board (PCB) with a black antenna and various electronic components, likely a wireless module. The board is populated with several surface-mount components, including a large silver-colored rectangular component (possibly a power amplifier or filter), several small black integrated circuits, and various passive components like capacitors and resistors. The PCB is mounted on a black plastic base. The text "206 LSPH02" is visible on the green PCB.
