

Quick Setup Guide

A99 Smart Mobile Payment Terminal

PAX Technology Limited

1. Checklist

Congratulations on receiving your PAX Technology payment terminal. We do hope you enjoy it! The box you have just opened should contain the following items:

- 1 x PAX A99 Smart Mobile Payment Terminal
 - 1 x AC Power Adapter
 - 1 x Thermal Paper Roll
 - 1 x Battery
 - 1 x Cable
-

2. Product Description

full-touchscreen version

3. Installation

- **USB Port:** connect to a USB-enabled device.
- **SIM/SAM/microSD Card:**
 - 1) Open the battery cover underneath of the terminal;
 - 2) Remove battery;
 - 3) Insert SAM/SIM/microSD cards into the corresponding card slots.

4. Instructions

- **Power On:** press and hold the Power button for 5 seconds until illuminates, showing that the terminal is being turned on.
- **Power Off:** press and hold the Power button for 3 seconds until the shutdown menu appears, tap Power Off > Click Power Off, and “Shutting Down” will appear.
- **Contactless Transactions:** Tap a contactless enabled card on the top end of the terminal where the contactless sensor is located, indicated by the contactless icon.
- **Chip Card Transactions:** With the card's chip facing upwards, insert the chip card fully into the chip card slot.

- **Magnetic Stripe Transactions:** With the card's magnetic stripe facing downwards, swipe the card through the magnetic reader at a constant speed, in either direction.
 - **Paper Receipts:** Tear off the receipt at a 45-degree angle to the paper cutter.
 - **Battery Charging:** With a charging cable connected, the device's charging status shows on the display.
-

5. General Usage Tips

- Avoid placing this product in direct sunlight for extended periods, nor in environments with excessively high temperature, moisture or dust.
 - Only qualified personnel should repair this product.
 - Before using cards in the chip & magstripe readers, please ensure they are free from any foreign objects.
-

6. Important Safety Warning

- Do not place the terminal or battery in direct sunlight, nor in environments with excessively high temperatures, smoke, dust, or dampness.
 - Do not attempt to disassemble the battery, nor insert or use foreign objects to penetrate the casing. Never place the battery in a fire or excessively hot surfaces. Take care not to drop the battery. Excessive external shocks or pressure could cause battery liquid leakage or result in the battery catching fire or even exploding. Keep the battery well away from children and animals.
 - Immediately replace any battery which appears to be deformed, expanded or in an overheated state.
 - We recommend you only use power adaptors supplied by PAX Technology. If you must use 3rd party supplier accessories, please ensure specifications meet exactly those recommended for our products, which must comply with international and local regulations & standards. Non-compatible power supplies, chargers or batteries could cause fires or even explosions, and will invalidate any product warranty.
 - Charge the battery when the indicator level is low, but make sure to never charge a battery continuously for more than 24 hours. If a battery is not used for a long time, please charge it at least once every 6 months to avoid overcharge or discharge damage. For long-term optimal product performance, it is recommended that a battery be replaced after 2 years of continual usage.
 - When disposing of the device, battery, or accessories, please do so responsibly and according to local regulations. These are not household waste items. Improper disposal of the battery could cause a fire or explosion, and any liquid leakage could be damaging to the environment and toxic to humans & animals.
 - Please use PAX adaptor and cable for better battery result and device life.
 - For a better experience, it's recommended to replace the battery if it has been used for more than 2 years.
-

7. Environmental Parameters

- **Working Environment:** Temperature: 0°C~45°C (32°F~113°F)
 - **Storage Environment:** Temperature: -20°C~70°C(-4°F~158°F)
 - **Humidity:** 5%~95% (non-condensing)

9. Notes

FCC compliance statement

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC SAR statement

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. End user must follow the specific operating instructions for satisfying RF exposure compliance. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

The portable device is designed to meet the requirements for exposure to radio waves established by the Federal Communications Commission (USA). These requirements set a SAR limit of 4 W/kg averaged over one gram of tissue. The highest SAR value reported under this standard during product certification for use when properly worn on the body.
