Introduction to the Product

Thank you for choosing SLC-120T420GA, Outdoor CPE.

SLC-120T420GA offers better performance over Outdoor CPE given that LTE reception is not impeded.

It offers easy installation, reliable network connection, advanced security & authentication features, and more.

Please read this User Manual carefully to learn about the SLC-120T420GA. It will help you to meet your diverse communication needs, at home and at the office.

1. Package Contents

Main Unit

Mounting Kits

User Manual

PoE

LAN Cable

AC Code
(100~240V)

Note :

- Please note that it performs the best with the accessories which are contained in the package, and the manufacturer will not be responsible for defects/damage or shortened product life resulting from the use of product in conjunction or connection with accessories, products, or ancillary/peripheral equipment not approved by the manufacturer.
- Please use the product with accessories which are contained in the package.
- The components, appearance of the product, specifications and etc. are subject to change without prior notice for performance improvement.

2. Functional Features

Function		Features
Model Name		SLC-120T420GA
LTE	Technical Standard	LTE 3GPP Release 12, Category 15, TDD Configuration 2 DL : 580Mbps (4x4 MIMO-2Layer, 4CA, 256QAM), UL : 30Mbps (2CA, 64QAM)
	Frequency Band	43(3650 ~3700MHz), 48(3550 ~3700MHz)
	Max. Transmit Power	11dBm
	Antenna	Internal Patch Antenna, 4x4 MIMO, 10.59dBi Gain
	HPBW (3dB Beam Width)	+/- 45 degree Dual Linear / Directional
External Interface		1 x Gigabit Ethernet RJ45 LAN port
		1 x Mini USIM Card Slot
		1 x Reset button
LED Indicators	Power	Sharing with Signal Strength
	Signal Strength	5 LEDs with 1 color (5 Level display)
Operating Temperature		-40° to +70°C
Power Supply		IEEE 802.3af, Giga PoE Injector (Input : 100~240VAC, Output : 48V/0.45A)
Dimension		275(W) x 285(D) x 78(H)mm

3. LED Presentation

Status icon & LED indicator	
Boot in progress	Blinking Yellow LED (1), Blinking period = 1sec
Network connection	Number of LED depending on signal strength - Most Strong Signal : Five yellow LED - Strong Signal : Four yellow LED - Middle Signal : Three yellow LED - Weak Signal : Two yellow LED - Very Weak Signal : One yellow LED

4. Mounting Configuration

Package List

You need the following :

① One Bracket

② Mounting Bar(2ea)

③ Mounting U-Bolt(2ea)

④ Bolts(4ea)

⑤ Toothed lock washer(4ea)

⑥ Bolt M3(6ea)

⑦ Nuts(4ea)

⑧ Spring Washers(4ea)

⑨ Washer(4ea)

5. Assembly sequence optimization

Step 1

Remove the two Bolt M3 from the outdoor CPE.

* Remaining 6 screws are enclosed in the mounting kits as ⑥

Step 2 (Installing USIM Card)

Carefully insert the USIM Card into USIM slot.

CAUTION :

The surface of IC(metal) should be facing downward from the USIM card.

Step 3

Remove the cap by turning. Then follow the next steps as shown below.

1. Remove the cap.
2. Put A, B, Cap and Aluminum plate to cable line in order.
3. Plug the cable line into the **LAN** hole of outdoor CPE.
4. Connect A and B in order.
5. Lastly, connect Cap to Aluminum plate by turning.

Step 4

Assemble the Aluminum plate and outdoor CPE using the screws Bolt M3(8ea).

Step 5

Attach item 1 to the back side of the device using item 4 as shown.
(Insert item 5 into item 4 before installing)

Step 6

Install the device to pole using item 2 and 3, tighten the bracket by using item 7, 8 and 9.

Step 7

Adjust the device, using the different position on the bracket.
Check the LED light (1~5).

RESET Button(When the device turned On)

- Press the reset button once : Device reboot
- Press and hold the reset button 5sec : Factory reset

Note : If you forget the Login password for the Outdoor CPE or IP address after making changes, use the reset button to restore the Outdoor CPE to its original factory default settings.

Configuration

1. Network Configuration

External Network

Safety precaution : Do not allow the PSE adapter to get wet. Keep it inside of the building. Liquid could damage your device or cause you injuries. Water damage can void your warranty. It is recommended to use the accessory provided.

Install a Outdoor CPE after connecting to the network.

If normal connection between Outdoor CPE and PC is checked, you have to set up the PC and Outdoor CPE. The purpose of PC setup is to control network configuration for Windows Windows 7/8/10 or Mac OS X to use the Internet while the PC is connected to a Outdoor CPE.

The purpose of Outdoor CPE setup is to connect the Outdoor CPE to the Internet. Please refer to the Outdoor CPE Setup chapter.

2. PC Configuration(Windows 7)

Most computers already have TCP/IP configuration enabled. For your computer to support CPE, please verify that the IP address and DNS settings are automatically generated in the Local Area connection of your Internet Protocol (TCP/IP) properties.

- In a Windows environment :
- Click **"Start"** button >> Click **"Control Panel"** >> Click **"Network and Internet Connection"** >> Click **"Network Connection"** >> Right-click **"Local Area Connection"** and Select **"Properties"** >> Select **"Internet Protocol 4 (TCP/IPv4)"** and click **"Properties"** >> Select **"obtain an IP address automatically"** and **"obtain DNS server address automatically"** >> Click **"OK"** .

3. How to check your IP address

- Open the Command Prompt window by clicking the “**Start**” button and selecting “**Run**”. Enter “**cmd**”, and click the “**OK**” button.

<Run cmd>

- When the Command Prompt window opens, enter the “**ipconfig**” command to verify the IP address, Subnet mask, and Gateway, which are automatically assigned to your PC.

Note: PCs connected to Device will receive own assigned IP address.

```
C:\>ipconfig

Windows IP Configuration

Ethernet adapter Local Area Connection:

    Connection-specific DNS Suffix  . : 
    IP Address. . . . . : 192.168.1.100
    Subnet Mask . . . . . : 255.255.255.0
    Default Gateway . . . . . : 192.168.1.1

C:\>_
```

<Verify IP address>

```
C:\Users\WSteve_Kin>ping 192.168.1.1

Pinging 192.168.1.1 with 32 bytes of data:
Reply from 192.168.1.1: bytes=32 time<1ms TTL=64
Reply from 192.168.1.1: bytes=32 time<1ms TTL=64
Reply from 192.168.1.1: bytes=32 time<1ms TTL=64
Reply from 192.168.1.1: bytes=32 time<1ms TTL=64

Ping statistics for 192.168.1.1:
    Packets: Sent = 4, Received = 4, Lost = 0 (0% loss),
    Approximate round trip times in milli-seconds:
        Minimum = 0ms, Maximum = 8ms, Average = 2ms
```

- If the host can reach the device using the ping command, the device has successfully attached.

Note: If an IP address is not assigned, check the following. and Then restart the PC and check whether an IP address is assigned.

- LAN cable connection between PC and CPE
- Check TCP/IP setup details

Log-in to Web Interface

The Web Browser allows you to manage the Device and to view.

In the Address Bar :

- Go to WEB "**http://192.168.1.1**" then press ENTER to access the login screen.
- The default one is "**user**" for both User Name and Password.
- You can change the Password after logging in (User Name and Password are case-sensitive).

Username = **user**
Password = **user**

Apply

Note : The Web Interface can be accessed by entering **http://192.168.1.1** in the Address Bar, regardless of the network connection status. When there is no input for 1 hour after your login to the Web Interface, you will be automatically logged out.

Setup on the web page

1. Dashboard

The screenshot displays the SEOWON INTECH web dashboard. At the top, there is a header with the company logo, a search bar, a user profile, a language dropdown set to 'English', and a 'Logout' button. On the left, a 'Menu' sidebar lists 'Dashboard' (selected), 'Connection Mode', 'Status', and 'Settings'. The main content area is titled 'Dashboard' and contains several sections:

- Mobile Network:** Shows 'Mode' as 'LTE Only' and 'Operator' as 'SEOWON'.
- Monitoring:** Displays data rates (UL Data Rate, UL Max Data Rate, DL Data Rate, DL Max Data Rate) all at '0 Kbps', and 'Device Up Time' as '12:12:01 up 2 min'.
- About:** Shows 'Firmware Version' as '1.0.4' and 'Firmware Creation Date' as '2017.12.06-19:07'.
- LTE:** Shows 'UICC State' as 'UICC Ready', 'Connection State' as 'Not connected', and 'PDN Type'.
- Network:** Displays 'LAN IP Address' as '192.168.1.1', 'LAN IP Subnet Mask' as '255.255.255.0', 'WAN IP Address', 'WAN IP Subnet Mask', and 'Operation Mode' as 'NAT'.
- Firewall:** Shows 'Status' as 'Enable'.

- Select “Dashboard” from the left menu.
- You can see the Mobile Network, LTE, Network, Firewall, Monitoring and Firmware Information.

2. Connection Mode

The screenshot shows a web interface for SEOWON INTECH. At the top, there is a header bar with the company logo, a search icon, a user profile icon labeled 'user', a language dropdown set to 'English', and a 'Logout' button. On the left side, there is a vertical menu with the following items: 'Menu' (with a sub-menu icon), 'Dashboard' (with a gear icon), 'Connection Mode' (with a person icon and highlighted in blue), 'Status' (with a status icon), and 'Settings' (with a gear icon). The main content area is titled 'Connection Mode' and contains two sections. The first section, 'Operation', has a label 'Auto-connect' and a dropdown menu currently set to 'Auto'. To the right of this is a blue 'Apply' button. The second section, 'Connect Manager', shows the 'Status' as 'Connecting'. Below this, the 'Action' row contains two buttons: a blue 'Connect' button and a greyed-out 'Disconnect' button.

- Select “**Connection Mode**” from the left menu.
- You can select operation mode Auto or Manual.
- You can see the status of Connect Manager.
- Start LTE Connection by clicking “**Connect**” or stop by clicking “**Disconnect**” button.

4.1 LTE

4.1.1 Cell Selection

The screenshot shows the Seowon Intech web interface. At the top, there is a logo for SEOWON INTECH, a signal strength indicator, a user profile icon labeled 'user', a language dropdown menu set to 'English', and a 'Logout' button. On the left side, there is a 'Menu' sidebar with the following items: Dashboard, Connection Mode, Status, Settings (highlighted), LTE, Cell Selection (highlighted), Cell Lock, PCI Cell Lock, SIM Management, Default PDN, Multiple PDN, Internet MTU, IPv6 Settings, Network, Firewall, User Management, Firmware Management, and Monitoring. The main content area is titled 'Cell Selection' and contains two sections. The 'Band Selection' section has a 'Mode' dropdown set to 'Full Band', a 'Status' field showing '43.48', and a 'Band Selection' row with checkboxes for 'Band-43' (checked) and 'Band-48' (checked), followed by an 'Apply' button. The 'Cell Selection Option' section has a 'Power Scan Option' row with three radio button options: 'First Detected Cell' (selected), 'Strongest Cell(Power On)', and 'Strongest Cell(Always)', followed by an 'Apply' button.

Power Scan Option: ☒ First Detected Cell ☐ Strongest Cell(Power On) ☐ Strongest Cell(Always) **Apply**

- Select “Settings” → “LTE” → “Cell Selection” from the left menu.
- You can change the mode “Full Band” or “Frequency”.
- Check the box and click the “Apply” button.

4.1.2 Cell Lock

The screenshot displays the SEOWON INTECH web interface. At the top, there is a header with the company logo, a user profile icon labeled 'user', a language dropdown set to 'English', and a 'Logout' button. On the left, a sidebar menu is visible with options: Menu, Dashboard, Connection Mode, Status, Settings, and a sub-menu for LTE including Cell Selection, Cell Lock (highlighted), SIM Management, Default PDN, Multiple PDN, Internet MTU, IPv6 Settings, Network, Firewall, User Management, Firmware Management, and Monitoring.

The main content area is titled 'Cell Lock'. It contains a 'Search Cell' section with a table of cell parameters:

Check	Index	DL-EARFCN	PCI	RSRP(dBm)	RSRQ(dB)	SINR(dB)
☒	1	42890	0x23 (35)	-106.4/-107.9	-7.0/-7.1	20.0/21.3

Below the table are 'Add' and 'Search' buttons. Underneath is a 'Cell Lock List' section with an 'Add +' button. It features another table:

Check	DL-EARFCN	PCI
-------	-----------	-----

Below this table are 'Delete', 'Delete All', and 'Apply' buttons.

- Select “Settings” “LTE” “Cell Lock” from the left menu.
- You can add current cell to lock or delete cell to unlock in the list.
- You can manually add cell by clicking “Add+” button.
- Finish setup by clicking the “Apply” button.

4.1.3 SIM Management

The screenshot shows the SEOWON INTECH web interface. At the top, there is a header with the company logo, a language dropdown set to 'English', and a 'Logout' button. On the left, a 'Menu' sidebar lists various options: Dashboard, Connection Mode, Status, Settings, LTE, Cell Selection, Cell Lock, SIM Management (highlighted), Default PDN, Multiple PDN, Internet MTU, IPv6 Settings, Network, Firewall, User Management, Firmware Management, and Monitoring. The main content area is titled 'SIM Management' and contains three sections: 1. 'PIN Information' showing 'PIN Status' as 'PIN DISABLED', 'RETRIES PIN' as '3', and 'RETRIES PUK' as '10', with a 'Refresh' button. 2. 'PIN Management' with a 'PIN Code' input field and 'Verify', 'Enable', and 'Disable' buttons. 3. 'PIN Change' with 'PIN Code', 'New PIN Code', and 'Confirm New PIN Code' input fields, and a 'Change' button. 4. 'PIN Unblock' with 'PUK Code' and 'New PIN Code' input fields, and an 'Unblock' button.

- Select “Settings” “LTE” “SIM Management” from the left menu.
- You can see the current status of SIM.
- Only the button operation is enabled to match the current status.
 - If you SIM card is locked, PIN Status shows “PIN ENABLED NOT VERIFIED”.
 - Then you should enter the PIN code and click the “Verify” button.
 - After success unlock PIN then you can attached the LTE network.
 - You can set new PIN code by unblocking with PUK code.
 - If you failed to unblock PIN, you never use this SIM card.

4.1.4 Default PDN

The screenshot shows the SEOWON INTECH web interface. At the top, there is a header with the company logo, a user profile icon labeled 'user', a language dropdown set to 'English', and a 'Logout' button. On the left, a 'Menu' sidebar lists various options: Dashboard, Connection Mode, Status, Settings (highlighted), LTE (expanded), Cell Selection, Cell Lock, SIM Management, Default PDN (highlighted), Multiple PDN, Internet MTU, IPv6 Settings, Network, Firewall, User Management, Firmware Management, and Monitoring. The main content area is titled 'Default PDN' and contains a 'Default PDN Connection' section. This section has three fields: 'APN Name' (a text input box), 'Authentication Type' (a dropdown menu currently showing 'NONE'), and 'PDN Type' (a dropdown menu currently showing 'IPv4v6'). An 'Apply' button is located at the bottom right of the configuration area.

- Select “Settings” “LTE” “Default PDN” from the left menu.
- You can set the PDN data such as APN, Authentication Type and PDN type(IPv4, IPv6).
- Put in the data to box then click “Apply” button.
- If you set wrong data, the device doesn’t attach the LTE network.

- Select “Settings” “LTE” “Multiple PDN” from the left menu.
- You can set the multiple PDN data for IMS, admin, App service.
- Select “Cid”, check “Enable”, put in the data to box then click “Apply” button.

4.1.6 Internet MTU

The screenshot shows the SEOWON INTECH web interface. At the top, there is a header with the company logo, a user profile section showing 'user', a language dropdown set to 'English', and a 'Logout' button. On the left is a vertical menu with options: Menu, Dashboard, Connection Mode, Status, Settings, LTE, Cell Selection, Cell Lock, SIM Management, Default PDN, Multiple PDN, Internet MTU, IPv6 Settings, Network, Firewall, User Management, Firmware Management, and Monitoring. The 'Internet MTU' option is selected. The main content area is titled 'Internet MTU' and contains the text: 'This page display the maximum number of bytes in the packets transmitted over the internet port.' Below this is a section for 'Internet MTU Settings' with a text input field labeled 'Internet MTU' containing the value '1500'. To the right of the input field is a note: '(The default is 1500, do not change unless necessary.)'. An 'Apply' button is located to the right of the input field.

- Select “Settings” “LTE” “Internet MTU” from the left menu.
- You can change the internet MTU size.
- Put in the data to box then click “Apply” button.

4.1.7 IPv6 Settings

The screenshot displays the SEOWON INTECH web management interface. At the top, there's a header with the company logo, a language dropdown set to 'English', and a 'Logout' button. On the left, a 'Menu' sidebar lists various system functions. Under the 'Settings' category, 'LTE' is expanded, and 'IPv6 Settings' is highlighted. The main content area, titled 'IPv6 Settings', contains two sections: 'IPv6 Setup' and 'DHCPv6 Address Settings'. In the 'IPv6 Setup' section, the 'IPv6 Enable' option is set to 'Enable'. The 'DHCPv6 Address Settings' section shows 'DHCPv6 Autoconfiguration Mode' set to 'Stateless' and 'DNS Server Address Mode' set to 'Auto'. An 'Apply' button is located at the bottom right of the settings area.

- Select “Settings” “LTE” “IPv6 Setup” from the left menu.
- You can Enable or Disable IPv6 function by selecting the list.
- You can set DHCPv6 Auto-configuration mode by selecting the list.
- You can set DNS Server Address Mode to “Auto” or “Manual”.
- After selecting the each mode, put in the data to all boxes.
- Finish setup by clicking the “Apply” button.

4.2 Network

4.2.1 Switch

- Select **“Settings”** **“Network”** **“Switch”** from the left menu.
- You can select Switch Mode to **“NAT”** or **“BRIDGE”**.
- Finish setup by clicking the **“Apply”** button.

- Select “Settings” “Network” “DHCP Server” from the left menu.
- Configure DHCP Server Setting.
 - IP address is used in the LAN cable that the device manages.
 - Setup IP address in “Gateway IP Address/ Gateway Subnet Mask” text boxes.
 - Initial Value is “192.168.1.1/255.255.255.0” and only the last byte in “Gateway Subnet Mask” box can be modified.
 - Finish setup by clicking the “Apply” button.

4.2.3 Port Management : DMZ/Port Forwarding/Port Triggering

The screenshot shows the SEOWON INTECH web interface. At the top, there is a header with the logo, a language dropdown set to 'English', and a 'Logout' button. On the left, a 'Menu' sidebar lists various options: Dashboard, Connection Mode, Status, Settings, Network (selected), LTE, Switch, DHCP Server, DMZ (highlighted), Port Forwarding, Port Triggering, VPN Configuration, VPN Passthrough, UPnP, QoS, DDNS, Firewall, User Management, Firmware Management, and Monitoring. The main content area is titled 'DMZ' and contains the following configuration options:

- Enable DMZ: ☐ Enable ☒ Disable
- Redirect ICMP To The Host: ☐ Enable ☒ Disable
- Exclude Web Server Port: ☒ Enable ☐ Disable
- Private LAN IP Address: 192 . 168 . 1 . 2

An 'Apply' button is located at the bottom right of the configuration area.

- Select “Settings” “Network” “DMZ” from the left menu.
- Configure DMZ(Demilitarized Zone)
 - Select whether or not to enable the DMZ function.
 - You can set “Redirect ICMP To The Host” and “Exclude Web Server Port”.
 - Set the IP address to have all ports opened in “Private LAN IP Address” content.
 - Finish setup by clicking the “Apply” button.

 - You can change the data by clicking “Edit” or “Del” button in the list.

4.2.4 VPN Configuration

The screenshot shows the SEOWON INTECH web interface for VPN Configuration. The top navigation bar includes the logo, a language dropdown set to 'English', and a 'Logout' button. The left sidebar menu is expanded to 'Settings' > 'Network' > 'VPN Configuration'. The main content area is titled 'VPN Configuration' and contains the following settings:

- VPN Configuration Settings**
 - VPN: L2TP (dropdown)
- L2TP Mode**
 - Server Address: (text input)
 - Server Address(Private): Disable (dropdown)
 - Username: (text input)
 - Password: (text input)
 - Pre Shared Key: (text input)
 - Connect Mode: Keep Alive (dropdown)
 - Redial Period: Seconds (text input) Seconds (text input)

At the bottom right of the settings area are 'Apply' and 'Cancel' buttons.

- Select “Settings” “Network” “VPN Configuration” from the left menu.
- You can set VPN mode by selecting “GRE”, “L2TP” or “PPTP”.
- After selecting the mode, put in the data to all boxes.
- Then click “Add” button.
- Finish setup by clicking the “Apply” button.

4.2.5 VPN Passthrough

- Select “Settings” “Network” “VPN Passthrough” from the left menu.
- The device support 2 types of service : PPTP Service, L2TP/IPSEC Service.
- Select the type(s) of VPN pass-through to use with the checkboxes.
- Finish setup by clicking the “Apply” button.

4.2.6 UPnP

The screenshot displays the SEOWON INTECH web management interface. On the left, a sidebar menu is visible with the following structure: Menu (Dashboard, Connection Mode, Status), Settings (LTE, Network, Firewall, User Management, Firmware Management, Monitoring). The 'Network' section is expanded, and 'UPnP' is selected. The main content area is titled 'Universal Plug & Play'. It features a toggle switch for 'UPnP Enable/Disable' currently set to 'Enable', with an 'Apply' button to the right. Below this is a 'Client List' section containing a table with the following headers: No., Client Program, Protocol, External Port, IP Address, and Internal Port. A 'Refresh' button is located at the bottom right of the table.

- Select “Settings” “Network” “UPnP” from the left menu.
- Select whether or not to Enable the Universal Plug & Play function.
- Finish setup by clicking the “Apply” button.
- When UPnP Client is connecting, it will appear on the Client List.

DDNS

Dynamic DNS

DDNS Enable ☒ Enable ☐ Disable

DDNS Setting

Service	dyndns.org
Hostname	hostname
Username	username
Password	password
Check for change IP every	300
Check-time unit	seconds
Force update every	80
Force-Time unit	minutes

Apply

- Select “Settings” “Network” “DDNS” from the left menu.
- Set the DDNS environment
 - If you want to set the DDNS, check “Enable” in the checkbox to enter necessary inputs.
 - After entering all the necessary information for DDNS Setting, finally, click the “Apply” button to finish setting.

4.3 Firewall

4.3.1 Basic

The screenshot shows the SEOWON INTECH web interface. At the top, there's a header with the logo, a search bar, a user profile, a language dropdown set to 'English', and a 'Logout' button. On the left, a 'Menu' sidebar lists: Dashboard, Connection Mode, Status, Settings (selected), LTE, Network, Firewall (selected), Basic (selected), Filter Setup, Access Control, IP-MAC Binding, User Management, Firmware Management, and Monitoring. The main content area is titled 'Firewall' and contains two sections. The 'Firewall Setup' section has five rows of settings, each with an 'Enable' (radio button) and 'Disable' (radio button) option. The 'SIP ALG Settings' section includes a text description, a checkbox for 'Enable SIP ALG', and a text box for 'SIP port' containing the value '5060'. Both sections have an 'Apply' button at the bottom right.

Firewall Setup	
Firewall Enable/Disable	☒ Enable ☐ Disable
Allow Ping From WAN	☒ Enable ☐ Disable
Allow HTTP login from WAN	☒ Enable ☐ Disable
Allow HTTPS login from WAN	☐ Enable ☒ Disable
Multicast Filter	☐ Enable ☒ Disable

SIP ALG Settings

The modem supports the SIP ALG function. The SIP application can run and communicate with other internet application.

Enable SIP ALG ☒

SIP port

- Select “Settings” “Firewall” “Basic” from the left menu.
- If you want to use the default Firewall function, check the “Enable” checkbox.
- You can set other firewall rules as Ping, HTTP, HTTPS login and Multicast Filter.
- If you want to use SIP ALG function, check enable and type port number in the box.
- For filter set up, select the filter item (IP, MAC, ACCEPT, DROP, BOTH, etc) and fill the blank.
- Finish setup by clicking the “Add” button.
- You can also delete the filter rule by clicking “remove” button in the Filter List.

4.4 User Management

4.4.1 Account

The screenshot displays the SEOWON INTECH web interface. At the top, there is a header bar with the SEOWON INTECH logo on the left, a user profile icon labeled 'user' in the center, and a language dropdown menu set to 'English' on the right, followed by a 'Logout' button. On the left side, there is a vertical 'Menu' sidebar. The 'Menu' is expanded to show 'User Management', which is further expanded to show 'Account'. The main content area on the right is titled 'Account' and contains the 'Account Management' section. This section includes a 'Privilege' dropdown menu set to 'user', and four input fields for 'Username' (containing 'user'), 'Current Password', 'New Password', and 'Confirm Password'. An 'Apply' button is located at the bottom right of the form.

- Select **“Settings”** **“User Management”** **“Account”** from the left menu.
- Set the password to be given to the administrator who manages the device.
- Enter the new password.
- Finish setup by clicking the **“Apply”** button.

4.4.2 Language

- Select “Settings” “User Management” “Language” from the left menu.
- Select the Language.
- Finish setup by clicking the “Apply” button.

4.4.3 Restore Default

- Select “Settings” “User Management” “Restore Default” from the left menu.
- To initialize all configurations the device, click “Apply” button.
- If you want to save, remove or reset this configuration click the button.
- The device will reboot automatically and it takes about 70 seconds.

4.4.4 Reboot

- Select “Settings” “User Management” “Reboot” from the left menu.
- To reboot by software, click “Apply” button.
- The device will reboot automatically and it takes about 60 seconds.

4.4.5 Date and Time

The screenshot shows the SEOWON INTECH web interface. At the top, there is a header with the company logo, a user profile icon labeled 'user', a language dropdown set to 'English', and a 'Logout' button. On the left is a 'Menu' sidebar with options: Dashboard, Connection Mode, Status, Settings (highlighted), LTE, Network, Firewall, User Management (with sub-items: Account, Language, Restore Default, Reboot), Date and Time (highlighted), Remote Management, Firmware Management, and Monitoring. The main content area is titled 'Date and Time' and contains a 'Time Zone Setup' section. This section includes: 'NTP Client' with radio buttons for 'Enable' (selected) and 'Disable'; 'Local Time' showing '2017-12-22 12:30:41'; 'Time Server' with a text input field containing 'my.pool.ntp.org'; 'Time Zone Select' with a dropdown menu showing 'Seoul'; 'Enable Daylight Saving' with an unchecked checkbox; 'Start Date' set to 'First Sunday of April at 2 o'clock'; and 'End Date' set to 'Last Sunday of October at 2 o'clock'. An 'Apply' button is located at the bottom right of the configuration area.

- Select “Settings” “User Management” “Date and Time” from the left menu.
- Configure Time Zone.
 - If you want to set the NTP Client, select “Enable”.
 - Set the “Time Server”.
 - Select the “Time Zone Select”.
 - If you want to set the “Daylight Saving”, check “Enable Daylight Saving”.
 - If you want to set the duration of “Daylight Saving”, set the below.
 - Finish setup by clicking the “Apply” button.
 - Changed configuration is applied immediately.

4.4.6 Remote Management

The screenshot shows the SEOWON INTECH web interface. At the top, there is a header with the company logo, a language dropdown set to 'English', and a 'Logout' button. On the left is a 'Menu' sidebar with options: Dashboard, Connection Mode, Status, Settings, LTE, Network, Firewall, User Management, Remote Management (highlighted), Firmware Management, and Monitoring. The main content area is titled 'Remote Management' and contains two sections: 'HTTP Server' and 'HTTPS Server'. The 'HTTP Server' section has fields for 'Remote IP Address' and 'Port Number' (set to 80, with a note '(The default is 80)'). The 'HTTPS Server' section has an 'Enable' checkbox (checked) and a 'Port Number' field (set to 443, with a note '(The default is 443)'). An 'Apply' button is located at the bottom right of the settings area.

- Select “Settings” “User Management” “Remote Management” from the left menu.
- You can set HTTP Server port and HTTPS Server port.
- If you want to set https server, check “Enable” and type Port Number.
- Finish setup by clicking the “Apply” button.

4.5 Firmware Management

4.5.1 Software

The screenshot shows the SEOWON INTECH web interface. At the top, there is a header with the company logo, a user profile icon labeled 'user', a language dropdown set to 'English', and a 'Logout' button. On the left, a 'Menu' sidebar lists various options: Dashboard, Connection Mode, Status, Settings (highlighted), LTE, Network, Firewall, User Management, Firmware Management (expanded), Software (highlighted), and Monitoring. The main content area is titled 'Software' and contains a 'Software Upgrade' section. This section includes a table for selecting files for four different filenames, each with a 'Choose File' button and a 'No file chosen' status. Below the table, there is a 'Status' field with the instruction 'Please select the update package file'. The 'Device Software Version' is displayed as '1.0.4'. An 'Update' button is located at the bottom right of the upgrade section.

Software Upgrade		
Filename 1	Choose File	No file chosen
Filename 2	Choose File	No file chosen
Filename 3	Choose File	No file chosen
Filename 4	Choose File	No file chosen
Status	Please select the update package file	
Device Software Version	1.0.4	
Update		

- Select **“Settings”** **“Firmware Management”** **“Software”** from the left menu.
- Select the firmware file by clicking the **“Browse...”** button.
- To start the firmware update, click **“Update”** button.
- The device will be restart automatically.

4.6 Monitoring

4.6.1 Iperf

The screenshot displays the 'Performance Measurement Tool' interface. On the left is a sidebar menu with options: Menu, Dashboard, Connection Mode, Status, Settings, LTE, Network, Firewall, User Management, Firmware Management, Monitoring, Iperf, Diagnostic, and Log. The 'Monitoring' section is expanded, showing 'Iperf' as the selected option. The main area is titled 'Iperf Settings' and contains the following fields: Status (with 'Enable' selected), Last Measurement Date/Time, Server Address, Server Port (5001), Management Port (5001), Measurement Time (60), Protocol Type (TCP), and TCP Client Number (1). A large empty box is present below these fields. At the bottom right are 'Refresh' and 'Apply' buttons. The top of the page shows the 'SEOWON INTECH' logo, a 'Tx' button, a user profile icon, a language dropdown set to 'English', and a 'Logout' button.

- Select **“Settings”** **“Monitoring”** **“Iperf”** from the left menu.
- You can use iperf by clicking the **“Enable”** button.
- Set the all data in the field.
- Finish setup by clicking the **“Apply”** button.
- Whenever you want to see the result, click **“Refresh”** button.

4.6.2 Diagnostic

The screenshot shows the SEOWON INTECH web interface. At the top, there is a header with the company logo, a language dropdown set to 'English', and a 'Logout' button. On the left, a 'Menu' sidebar lists various options: Dashboard, Connection Mode, Status, Settings, LTE, Network, Firewall, User Management, Firmware Management, Monitoring (expanded), Iperf, Diagnostic (selected), and Log. The main content area is titled 'Diagnostic' and contains two tabs: 'Ping' (active) and 'Trace router'. The 'Ping' tab displays configuration fields: 'IP Address (URL)' with an empty text box, 'Ping Packet Size (Bytes)' set to 56, 'Ping Timeout (sec)' set to 30, and 'Ping Count' set to 4 with a dropdown arrow. Below these fields is a large, empty rectangular area for results. An 'Apply' button is located at the bottom right of the configuration section.

- Select “Settings” “Monitoring” “Diagnostic” from the left menu.
- Configure the Ping.
 - If you want to test ping, enter IP Address to “IP Address (URL)”.
 - Set the all data in the field.
 - Click the “Apply” button to test.
 - The results come out below.

Troubleshooting

Refer to the following if you are having trouble connecting to the Internet:

1 Check the status of outdoor CPE.

- Check if the USIM Card is inserted.
- Check if the each Cable is connected. (Adapter, LAN Cable, PoE Cable)

2 Check the IP address of PC.

- For Windows 7/8/10
- Run [Command Prompt] and enter the [ipconfig] command to check the [IP address].

3 If IP Address is not normal – Set the IP Address of the PC manually.

- For Windows 7/8/10

- ① Start > Control Panel > Network and Internet > Network Connections > Mouse right-click > Local Area Connection and Select Properties
 - ② Click Properties of [Internet Protocol Version 4 (TCP/IPv4)] among Components.
 - ③ Click [Use the following IP address]
 - ④ Enter [192.168.1.2] for IP Address, [255.255.255.0] for Subnet Mask, and [192.168.1.1] for Default Gateway.
 - ⑤ Click [Use the following DNS Server Address].
 - ⑥ For [Preferred DNS Server], enter the communication company server of each country.
 - ⑦ Click [OK]. Click [OK] again in the [Local Area Connection Properties] window.
- For MAC OS X
 - ① From the “Apple” menu, Choose “System Preference.”
 - ② Click on the [Network] icon in the [Internet & Network] category.
 - ③ Click on the [Ethernet] option from the left hand side of the Network setting window.
 - ④ Select [Manually] option from the [Configure] drop-down menu.
 - ⑤ Enter [192.168.1.2] for IP Address, [255.255.255.0] for Subnet Mask, and [192.168.1.1] for Default Gateway.
 - ⑥ For [DNS Server], enter the communication company server of each country.
 - ⑦ Click [Apply].

4 Run [MS-DOS] or [Command Prompt] and then perform PING Test with [192.168.1.1].

A message [Reply from 192.168.1.1: bytes=32 time=1ms TTL=64] should appear when running [ping 192.168.1.1] command. If the result of the Ping test does not arrive properly, please contact the Customer Support Center.

Safety Information

Minor injury or product damage can occur the following directions are violated.

Caution

- Do not put any object on the product.
- Avoid heating devices.
- Do not disassemble, repair or redesign the product.
- Be careful not to allow any foreign matter inside the product.
- Do not leave the Product in a location where it is exposed to severe static electricity, as this can cause the product to malfunction.
- Do not put any metallic object (coin, hair pin) or flammable object inside the product, or drop the product.
- The device must be installed to provide a minimum of 20cm between the device and persons to comply with RF exposure limits.
- The device must be turned off during the flight.

Legal Information

FCC Part 15.105

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment.

This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

FCC Part 15.19

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

FCC Part 15.21

Changes or modifications not expressly approved by the manufacturer (or party responsible) for compliance could void the user's authority to operate the equipment.

FCC Radiation Exposure Statement:

The output power from the device is below the threshold for requiring RF exposure evaluation. The device must be installed to provide a minimum of 20cm between the device and persons to comply with RF exposure limits.

"This product meets the applicable Innovation, Science and Economic Development Canada technical specifications"

FCC ID : V7MESLC-120T420GA

Warranty Information

This product is the result of high-class craftsmanship based on strict quality control procedures.

- In case of Product failure or malfunction during normal usage, your product will be repaired free of charge within the Limited Warranty period.
- The Consumer shall bear any labor or parts charges not covered by this Limited Warranty.
- At the request for repair, you must provide the proof of purchase and the warranty.
- Keep the warranty in a safe location because it is not reissued.

Purchase date		
Quality warranty period	1(one) year
