

Regulatory compliance information

Regulatory Statement for FCC

Instructions to the final system integrators

The final system integrator must ensure there is no instruction provided in the user manual or customer documentation indicating how to install or remove the transmitter module.

This module should be installed in the host device according to the interface specification.

Labeling

FCC ID: V9X-NK24Y

The proposed FCC ID label format is to be placed on the module. If FCC ID is not visible when the module is installed into the system, "Contains FCC ID: V9X-NK24Y shall be placed on the outside of final host system.

The following information must be indicated on the host device of this module.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

*If it is difficult to describe this statement on the host product due to the size, please describe in the User's manual.

The following statements or equivalent must be described on the user manual of the host device of this module;

Caution: Any changes or modifications not expressly approved by the party responsible for product compliance could void the user's authority to operate the equipment.

This transmitter must not be co-located or operated in conjunction with any other antenna or transmitter.

Caution: Exposure to radio frequency radiation

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment and meets the FCC radio frequency (RF) Exposure Guidelines. This equipment has very low levels of RF energy that are deemed to comply without testing of specific absorption rate(SAR).

Regulatory Statement for IC**Antenna**

This radio transmitter IC Number 6079A-NK24Y has been approved by Industry Canada to operate with the antenna types listed below with the maximum permissible gain and required antenna impedance for each antenna type indicated. Antenna types not included in this list, having a gain greater than the maximum gain indicated for that type, are strictly prohibited for use with this device.

The antenna used this module is as follows;

Antenna Type & Antenna Gain;

Sleeve Antenna (ANT-2G4S2/ANT-2G4S3) 2.14 dBi

Pattern antenna -2.0 dBi

Instructions to the final system integrators

The final system integrator must ensure there is no instruction provided in the user manual or customer documentation indicating how to install or remove the transmitter module.

This module should be installed in the host device according to the interface specification.

Labeling:

IC Number: 6079A-NK24Y

The proposed IC Number label format is to be placed on the module. If IC Number is not visible when the module is installed into the system, "Contains IC: 6079A-NK24Y" shall be placed on the outside of final host system.

The following statements or equivalent must be described on the user manual of the host device of this module;

This device complies with Industry Canada's licence-exempt RSSs. Operation is subject to the following two conditions:

- (1) This device may not cause interference, and
- (2) This device must accept any interference, including interference that may cause undesired operation of the device.

Le présent appareil est conforme aux CNR d'Industrie Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes : (1) l'appareil ne doit pas produire de brouillage,

(2) l'utilisateur de l'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.

Caution: Exposure to Radio Frequency Radiation

This equipment complies with IC radiation exposure limits set forth for an uncontrolled environment and meets RSS-102 of the IC radio frequency (RF) Exposure rules. This equipment has very low levels of RF energy that are deemed to comply without testing of specific absorption rate (SAR).

Cet équipement est conforme aux limites d' exposition aux rayonnements énoncées pour un environnement non contrôlé et respecte les règles d' exposition aux fréquences radioélectriques (RF) CNR-102 de l' IC. Cet équipement émet une énergie RF très faible qui est considérée conforme sans évaluation du débit d' absorption spécifique (DAS).
