Test Setup	Radiated measurement for below 30 MHz (Front side)
	
Test Setup	Radiated measurement for below 30 MHz (Rear side)
	

Test Setup	Radiated measurement for below 1 GHz (Front side)
	
Test Setup	Radiated measurement for below 1 GHz (Rear side)
	

Test Setup	Conducted measurement (Front side)
	 A photograph showing the front side of the test setup. A wooden table is in the foreground. On the table, there is a black electronic device with a red wire connected to it. In the background, inside a glass-enclosed area, there is a white power supply unit and a blue and white electronic device with a fan, connected by various cables.
Test Setup	Conducted measurement (Rear side)
	 A photograph showing the rear side of the test setup. A wooden table is in the foreground. On the table, there is a black electronic device with a red wire connected to it. In the background, inside a glass-enclosed area, there is a white power supply unit and a blue and white electronic device with a fan, connected by various cables. A laptop and other equipment are visible on a desk in the background.
