

技术要求

1.物料号： SW1A7441EB010

2.产品名称： U1 Wireless Kinetic Switch

3.材质: 125克铜版纸

4.尺寸: 60\*80mm

60.00 mm

80.00 mm

|                                                                                                                                           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |                                                                                                                              |                                  |  |

|  <p>INSTRUCTIONS</p> <p>U1 WIRELESS KINETIC SWITCH</p> | <p><b>Product Description</b></p> <p>U1 Wireless Kinetic Switch is a push-button self-powered switch with MEA (Micro Energy Acquisition) module inside , which transform mechanical energy into electricity to drive RF chipset work. It is able to control the wireless receiving controller after pairing with it.</p> <p><b>Product Parameters</b></p> <p>Product Series: U1 Series<br/>Work Type: Push Button Type<br/>Number of Button: 2 buttons<br/>Power Supply: Self-powered<br/>Working Frequency: RF 902MHz<br/>Lifetime: &gt; 100,000 times<br/>Modulation Mode: FSK<br/>Dimensions: L66.5*W33*H15.5mm<br/>Operating Temperature: -20°C~+55°C<br/>Control Distance: 80m(outdoor) 25m(indoor)<br/>Use Method: Pairing with wireless receiving controller</p> <p><small>Note: The effective distance data is measured by Lab and it will vary due to the changes of the environment in the actual use</small></p> | <p><b>Ordinary Pair with Controller</b></p> <p>The U1 Wireless Kinetic Switch need to be paired with wireless receiving controller. The ordinary pairing method is: press and hold the pairing button on controller for 3 seconds, release the pairing button when the indicator light flashes , and then press one button of the U1 Wireless Kinetic Switch once. The indicator goes off, which means that the pairing is successful. Then you can control the wireless receiving controller by this button.(More detailed steps, please refer to the receiving controller instruction.)</p> <p><b>Directional Pairing with Controller</b></p> <p>In order to meet the user's habits of the switch and to ensure that the multiple controllers can be turned on and off at the same time in the one-to-multiple mode, we design the directional pairing mode on the U1 Wireless Kinetic Switch. The directional pairing method is: press and hold the pairing button on the controller for 3 seconds, and release the pairing button when the light is flashing, and then press one of the U1 Wireless Kinetic Switch 4 times (in 1 seconds). The indicator light goes off, which means pairing is successful. After directional pairing is successful, press the bottom button to turn off the light, and press the top button to turn on the light. Press and hold the bottom button to dim, and press and hold the top button to brighten.</p>  | <p><b>Installation Instructions</b></p>  | <div>CERTIFICATE INSPECTED</div> |  |

FCC Warning

This device complies with part 15 of the FCC Rules . Operation is subject to the following two conditions:  
(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

**Note:** This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.
