

Funtion of TX

Technical Description

The equipment under test(EUT) is a 2.4GHz transmitter with 4 channels operating at 2405-2476MHz;
It is powered by 3V DC(2*1.5V "AA" batteries).

Modulation:GFSK;

Number of Channel: 4Channels;

Support Data Rate: 1Mbps;

Conducted Power: -9dBm;

Antenna Gain: -11.2dBi;

Antenna Type:Integral Antenna;

TX FUNCTION

The functions of TX MAIN Ics are mentioned as below:

- 1)U1 acts as mcu for system and gaming control;
- 2)VR1,VR2 acts as Control lever,
- 3)U1 acts as 2.4G RF module.
