

### Antenna Specification

|                                                 |                                       |
|-------------------------------------------------|---------------------------------------|
| Product Name                                    | 2.4G ANT                              |
| Manufacturer                                    | AUDIOWIN TECHNOLOGY CO.,LTD           |
| Frequency                                       | 2400~2483MHz                          |
| Antenna Type                                    | PCB Microstrip Antenna                |
| Gain                                            | Max -0.68dBi                          |
| V.S.W.R                                         | $\leq 2.0$                            |
| Impedance                                       | 50Ohm                                 |
| Operating Temp. Range                           | 5°C ~ 35°C                            |
| Size                                            | 19mm x 7mm                            |
| Can the antennas be transmitted simultaneously? | There's only one transmitting antenna |
