

Attestation for U-NII 6GHz Devices

July 23, 2026

UL Verification Services Inc.
47173 Benicia Street, Fremont, CA 94538

FCC ID: VPYLB2EA003
Applicant: Murata Manufacturing Co., Ltd.

To whom it may concern:

We, Murata Manufacturing Co., Ltd., attest that this device under FCC ID VPYLB2EA003 complies with device protocol requirements and operational restrictions:

for ☐ - Low Power Indoor Access Point 6ID / ☐ - Indoor Subordinate 6PP / ☒ - Indoor Client 6XD /
☐ - Dual Client 6CD / ☐ - Standard Power Access Point 6SD / ☐ - Fixed Client 6FC /
☐ - Standard Client 6FX / ☐ - Very Low Power 6VL (all that apply)

Indoor Client 6XD:

1. Device Protocol Attestation Statement:

- a. As demonstrated in the test report, Contention-Based Protocol is permanently embedded in the module and is not host-dependent.
- b. The device will only associate and connect with a low-power indoor access point or subordinate device and never directly connect to other client devices.
- c. This device will always initiate transmission under the control of a low-power indoor AP or subordinate except for brief transmissions before joining a network. These short messages will only occur if the client has detected an indoor AP or subordinate operating on a channel. These brief messages will have a time-out mechanism such that they will not continually repeat the request if they do not receive a response from an AP.
- d. Transmissions will be lower or equal to the power advertised by the indoor low-power access point or subordinate and never above the maximum output power allowed by the FCC grant for equipment class 6XD.

2. This device is prohibited for control of or communications with unmanned aircraft systems, including drones.

Thank you for your attention to this matter.

Sincerely,

K. Hayashikoshi
