Statement of FM transmitter disable

Product: Mobile phone
Model No.: F-02H
FCC ID: VQK- F02H

The above device (Mobile phone) has an integrated low power FM transmitter. This integrated low power FM transmitter can not be activated by the user in case the Mobile phone is used or switched on outside of Japan. The integrated low power FM transmitter can also not be activated by the user in case the Mobile phone is outside of the service area, or inside the network which has the country code other than the country code of Japan (440) while the mobile phone is switched on. In both cases, the integrated low power FM transmitter is also not activated automatically.

When the Mobile phone is inside the service area of a Mobile phone network, it will check all available cellular networks for the country code (amongst other things). The integrated low power FM transmitter will not switch on automatically in case the Mobile phone detects networks having a country code other than the country code of Japan. (440)

Also the user access to all functions related to the integrated low power FM transmitter will be disabled in case the Mobile phone detects networks having a country code other than the country code of Japan.

This will prevent the user from manually switching on the integrated low power FM transmitter in case the Mobile phone is operated within the service area of a Mobile phone network which does not have the country code of Japan. (440)
