

User Manual

MAYA-W261-00B

Juniper Systems

14 May 2026

Juniper Systems has obtained FCC and ISED approvals under our own certification numbers for the radio module originally marketed by Ublox as model MAYA-W261-00B.

As the modules are too small to mark with the FCC and ISED certification numbers, regulations require that we provide that information in the user manual. These certification numbers are indicated below.

For other details, please refer to the original manual published by Ublox at the following links:
