Subject: Power Control Declaration
FCC ID: VSFAR4

Federal Communications Commission
7435 Oakland Mills Road - Gate A
Columbia, Maryland 21046

To whom it may concern:

We declare the WLAN function of this product will be under the control of low-power, indoor access point and standard power access point. The product can adjust a transmit output power based the category of access point to which it is connected. This function is automatically controlled by software.

Further, we declare that software and configuration control is restricted to prevent third parties from changing these parameters so that the device will remain in compliance with the technical rules under which it is certified.

Sincerely,

A handwritten signature in blue ink, appearing to read 'Jordan Allen', written over a horizontal line.

Jordan Allen
Vice President of Engineering
