

EXHIBIT 4 - TEST SETUP PHOTOGRAPHS

Conducted Emission Test Setup*	 A photograph showing a conducted emission test setup. On the left, a spectrum analyzer is placed on a wooden bench, connected via orange cables to a power line filter unit on the floor. To the right, a laptop sits on another wooden bench, displaying a blue screen. The background shows a plain wall with a power outlet strip.
Radiation Emission Test Setup (Below 30MHz)	 A photograph of a radiation emission test setup in an anechoic chamber. The walls are lined with white, square-shaped electromagnetic wave absorbers. In the center, a device is placed on a yellow cardboard box. In the foreground, a blue metal frame stands on a wooden base, with a cylindrical object positioned inside its lower section. The floor is dark and reflective.

Radiation Emission Test Setup (30MHz to 1GHz)	 A photograph of a radiation emission test setup for the 30MHz to 1GHz range. A yellow test chamber is positioned in the center of an anechoic chamber, surrounded by white pyramidal absorbers. A black device is placed on top of the chamber. A metal railing is visible on the right side of the frame.
Radiation Emission Test Setup (1GHz to 18GHz)	 A photograph of a radiation emission test setup for the 1GHz to 18GHz range. A yellow test chamber is positioned in the center of an anechoic chamber, surrounded by white pyramidal absorbers. A red object is placed on top of the chamber. A blue pyramidal absorber is visible in the foreground, and a metal railing is visible on the right side of the frame.

**Radiation Emission Test
Setup (Above 18GHz)**
