This document shall not be reproduced, except in full, without the written approval of the LCIE. This document contains results related only to the item tested. It does not imply the conformity of the whole production to the items tested. Unless otherwise specified, the decision of conformity takes into account the uncertainty of measures. This document doesn't anticipate any certification decision. The COFRAC accreditation only attests the technical capability of the testing laboratory for the tests covered by the accreditation. Only tests not covered by the COFRAC accreditation are marked with asterisk (*)

Equipment under test (EUT): FAST 5260CV (& FAST 5260)
Serial Number: NQ1529409006864

WIFI home router

Power supply n° 1
Model: **NBS30E120250VU**
Manufacturer : **NETBIT**

Power supply n°2
Model: **MSA-C2500IS 12.0-30D-US**
Manufacturer : **MOSO**

Equipment Under Test

Note: All these tests have been performed on the worst model FAST 5260CV model equipped with 2 usb ports. Due to the similarity between FAST 5260CV and FAST 5260 (the only difference is that FAST 5260 is equipped with only 1 usb port), all results recorded in this test report are applicable for both models FAST 5260 CV & FAST 5260.

3.6. CONCLUSION

Measurements of Radiated Emissions, performed on the sample of the product **FAST 5260CV** (& FAST 5260), SN: NQ1529409006864 , in configuration and description presented in this test report, show levels **conform to** the FCC part 15.209 limits.

As a consequence, FAST 5260 version is thereby considered as compliant with the FCC part 15.209 limits.
