

MICROCHIP

ATTESTATION REGARDING CONTINUED APPLICABILITY OF TEST DATA

Date	08/25, 2026
FCC ID	VW4A091729
Applicant / Grantee	Microchip Technology Inc.
Product / Model	2.4 GHz Amp ZigBit Module / ATZB-RF-233-1-C
Original Test Report	No. 19660034 001, dated September 30, 2013
Original Testing Laboratory	TÜV Rheinland (India) Pvt. Ltd.
Application Type	Class II Permissive Change

To Whom It May Concern:

Microchip Technology Inc., as the applicant and grantee for the above-referenced equipment authorization, hereby attests that it has reviewed the current device configuration, the changes covered by this application, and the test data contained in Test Report No. 19660034 001.

Based on this review, Microchip Technology Inc. confirms that:

1. The test data contained in Test Report No. 19660034 001 remain representative of and applicable to the device covered by the current application, except for any items supported by supplemental test data submitted separately.
2. All hardware, RF circuitry, printed circuit board, bill of materials, firmware, RF output power, antenna, and operational changes that may affect the device's RF characteristics have been fully disclosed in the Class II Permissive Change documentation.
3. No undisclosed change has been made that would invalidate the referenced test data or cause the device to operate outside the configurations represented by the original report and the current application.
4. Based on the technical review performed for this application, the referenced test data, together with any supplemental information submitted with the application, support compliance with the currently applicable technical requirements of FCC Part 15.

Microchip Technology Inc. accepts responsibility for the accuracy of the device configuration and change information stated in this attestation.

Sincerely,

Authorized Signature
