Correspondence Number	Memo
VW4ATWILC1000-1	1) The operational description does not provide information regarding the type of modulations used in the device. Please provide this information. Modulation techniques used are DSSS and OFDM. 2) No exhibit for external photos was provided. Please provide the external photos. An External Photos exhibit has been provided. 3) The report and modification letter show different power level settings for the middle channels in the 802.11b mode. Please clarify and correct the appropriate exhibit. A corrected report has been provided. 4) The RF exposure calculations show an incorrect power level. Please provide a corrected exhibit. A corrected RF Exposure calculation has been provided. 5) The schematics show components values, such as U3 and R4, that do not match the internal photos. Please provide corrected schematics. A corrected Schematics diagram has been provided.
