

DD1146H

Receiver Instruction

Version: A/00

Product Features

DD1146H receiver

- Switch Direction
- Jog & Tilt
- Stall Protection
- Connectable 12V LED strip
- Rated voltage: DC 12V
- Radio frequency: 433.92MHz
- Working temperature: -10°C ~ +50°C
- One DD1146H receiver can store Max. 10 channels, after more than 10 channels, only the last channel will be covered recycledly

Radio Range

Note: The effective radio distance will deviate due to the actual environment.

DC 12V	L1(indoor)	Radio frequency
	35m	433.92MHz

Matchable Emitters And Motors

DD1600HE
Single-channel emitter

DD1600HE
Back

Best Installation Distance

- 1 The shortest distance between receiver and ground $\geq 1.5m$
- 2 The shortest distance between receiver and roof $\geq 0.3m$
- 3 The shortest distance between receiver and receiver $\geq 0.2m$

Wiring

Pairing

Switch Rotating Direction

Pairing Additional Emitter

Note: Emitter **a** is paired one while emitter **b** is the unpaired one.

Jog Mode & Running Mode Switch

Jog Distance

Note: This operation needs to be switched to jog mode first.

1, Increase the jog distance

2, Reduce The Jog Distance

Delete All Emitters

RF exposure statement

This equipment complies with the FCC radiation exposure limits set forth for an uncontrolled environment. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

FCC Warning

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

NOTE 2: Any changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
