Change in FCC ID – Labeling Declaration for RF Module

FCC ID: W56LV51C2BW0
Model number: LifeVest LV 5100

Dear Sir or Madam,

We hereby submit this declaration in support of our application for a Change in FCC ID for the RF module referenced under the original certification.

The RF module will **not** be marketed, sold, or otherwise made available as a stand-alone product to the general public. It will be integrated exclusively into designated host products by our company or authorized partners. The module will **not be imported, distributed, or sold in the United States except as part of the final host equipment.**

Because the module is never exposed to end users as an independent product, it will not carry its own FCC ID label on the module housing. Instead, the FCC ID for the module will be placed on the **host product's exterior label** and/or in the **host product user documentation**, consistent with FCC requirements for modules that are not customer-replaceable and not marketed separately.

This approach ensures that all required regulatory information is clearly accessible to the end user without placing labeling on the internal module itself.

We confirm that all labeling requirements under 47 CFR §2.925 and §15.19 will be met at the host-product level.

Should you require any additional information, please feel free to contact us.

Sincerely,

Signature:

A handwritten signature in blue ink that reads "Stephanie Kladakis".
