Output Power is conducted. This device is certified for use in mobile and fixed applications; where the transmitter antenna(s) is at least 20cm from all persons. The antenna(s) used for this transmitter must not be co-located or operating in conjunction with any other transmitter antenna, except in accordance with FCC multi-transmitter product procedures. To meet the MPE RF Exposure, ERP and EIRP limits, the antenna gain including cable loss must not exceed:

9.8 dBi at 700 MHz;

10.0 dBi at 850 MHz;

6.5 dBi at 1700 MHz and

8.7 dBi at 1900 MHz.

End users and installers must be provided with transmitter operating conditions and installation instructions for satisfying compliance. This filing is only applicable for: 700 MHz LTE; 850 MHz Cell; 1700 MHz WCDMA and 1900 MHz PCS operations.

The Grantee is responsible for providing the documentation required for modular use. The responsibility for use of this module in all configurations remains with the Grantee.
