Overview

Warn Industries is submitting this application on behalf of Microchip Technology, Inc. for a class 2 permissive change to radio module, FCC ID: W7OMRF24J40MDME. The purpose of this change is show compliance to RF Exposure limits when the radio module is installed in Warn Industries winch control end products. Body SAR measurements were demonstrating that the winch control unit can safely be use closer than 20 cm to operators.

No. Application did not request confidentiality.

Recommendation

All items have been resolved and completed to my satisfaction; therefore I recommend this application for approval.
