[illegible]

A photograph of the back of a white electronic device, likely a handheld PDA or early smartphone. The device has a white plastic casing. A large black rectangular area, which is the battery cover, is visible. On this black area, the text 'R55627V-MWAIN-V0.1' is printed in white. To the right of the text, there are two rectangular cutouts, possibly for a camera or sensors. A red oval is drawn around the black battery cover area, highlighting the text. The device is resting on a blue textured surface.
