FCC 15.203 Attestation Letter Explaining Professional Installation

For

FCC ID: WHVWCU1002601

- 1) The WELS WCU Model1002601 is not marketed to the general public.
This equipment is FAA certified for use only on the Boeing 787 airplane. The WCU and antenna are mounted out of view of aircraft passengers and only accessible after removal of 787 Cabin interior panels. The WCU and antenna are only removed and installed by airline maintenance personnel. For personnel and equipment safety the airplane I/O connector for the WCU is designed so that when it is removed from the WCU it disconnects power from the unit. Labels and nameplates on all WCU are not visible until the unit is removed from its installation location on the airplane. As such The device is obviously not sold retail, to the general public or by mail order, it designed and sold specifically to Commercial Aircraft Manufacturers such as Boeing Aircraft
- 2) As the WELS WCU is fully integrated into the Aircraft, it can only be installed by trained Boeing personnel to meet strict FAA requirements. Being embedded into an aircraft makes this an obviously unique and controlled installation
- 3) As addressed in points above, the WELS WCU is only designed to be integrated by professional installers into a Boeing Aircraft

Sincerely,

A handwritten signature in black ink, appearing to read "Rod Iverson", written over a horizontal line.
