Class II permissive change

This is a request to add a new model to an existing family under IC Certification No: 5530C-ARU4ELCU6 originally granted on April 28-2015.

The new model is ARU-CSB-ELC-FCC. FCC Certification No: WJ9-ARU4ELCU6 originally granted on April 24-2015. The new model is ARU-CSB-ELC-FCC

The difference between ARU-CSB-ELC-FCC to the existing family is:

- The new PA module is pin-for-pin compatible.
- The new amplifier has the same basic function as the old chip
- There are no changes to the radio parameters.

Sincerely,

Daniel Schkalda
managing director
