Federal Communication Commission Interference Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution:

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) This device must accept any interference received, including interference that may cause undesired operation

Attention :

Tous changements ou modifications n'ayant pas été expressément approuvés par l'organisme responsable de la conformité peuvent enlever tout droit à l'utilisateur de faire fonctionner ce matériel.

Cet appareil est conforme à la partie 15 des règles de la FCC. L'utilisation de cet appareil est soumise aux deux conditions suivantes :

- (1) Ce matériel ne doit pas engendrer d'interférences nuisibles, et
- (2) Ce matériel doit accepter toute interférence reçue, y compris les interférences qui pourraient avoir des effets non désirés sur son fonctionnement

RF Exposure Information (SAR)

This device meets the government's requirements for exposure to radio waves. This device is designed and manufactured not to exceed the emission limits for exposure to radio frequency (RF) energy set by the Federal Communications Commission of the U.S. Government.

The exposure standard employs a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit set by the FCC is 1.6 W/kg. Tests for SAR are conducted using standard operating positions accepted by the FCC with the EUT transmitting at the specified power level in different channels.

The highest SAR value for the device as reported to the FCC is **0.866 W/kg** when placed next to the body.

This symbol indicates this Tablet PC complies with the Directive 2004/108/EC, 1999/5/EC and the European Union's Low Voltage Directive 2006/95/EC.
