Instruction

MACALLY

1. Before first time use or whenever the LED flashes red(indicating battery low), charge the BTNUMKEYPRO until the LED changes from red(charging) to off(full). Switch to turn on the BTNUMKEYPRO.

2. Bluetooth pairing for first time use

- Press the Pair button in the front of BTNUMKEYPRO, the LED will flash blue slowly(pairing mode).
- Open Bluetooth setup program in your Mac , Windows PC or mobile device to start pairing process.
- Follow the instruction on the computer or mobile device screen to finish pairing with the BTNUMKEYPRO, the LED will flash quickly for a couple of seconds then stop.

3. OS indicator
BTNUMKEYPRO fully supports both Windows PC(& Android) and MacOS(& iOS/iPadOS), please press PC/Mac key on the BTNUMKEYPRO to toggle it to your OS. The LED(OS) indicator should be off for Mac all the time. For Windows PC, the LED should be in solid blue when typing, after 5 minutes of inactivity the LED turns off to save battery, but will turn on to solid blue when typing again.

LED(OS)
PC: Blue...off...blue...off...
Mac: Off

4. Troubleshooting tips
Windows PC users: If you can't type numbers or shortcut keys correctly from the BTNUMKEYPRO, please follow #3 above to toggle BTNUMKEYPRO to your PC OS first, then press Num Lock key to enable number typing in your Windows, repeat pressing Num Lock key once if needed.

Mac users: If you can't type shortcut keys correctly from the BTNUMKEYPRO, please follow #3 above to toggle BTNUMKEYPRO to your Mac OS first. If you can't type numbers from the BTNUMKEYPRO, please go to Mac System Preferences, then Accessibility, (1) under Mouse & Trackpad, uncheck the option "Enable Mouse Keys"; and (2) under Keyboard and Hardware tab, uncheck the option "Enable Sticky Keys". Then try to type numbers.
