

ISED compliance statement

This device contains licence-exempt transmitter(s)/ receiver(s) that comply with Innovation, Science and Economic Development Canada's licence-exempt RSS(s). Operation is subject to the following two conditions:

(1) This device may not cause interference.

(2) This device must accept any interference, including interference that may cause undesired operation of the device.

L'émetteur/récepteur exempt de licence contenu dans le présent appareil est conforme aux CNR d'Innovation, Sciences et Développement économique Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes :

(1) L'appareil ne doit pas produire de brouillage;

(2) L'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.

FCC Statement

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) This device must accept any interference received, including interference that may cause undesired operation. Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates,uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

—Reorient or relocate the receiving antenna.

—Increase the separation between the equipment and receiver.

—Connect the equipment into an outlet on a circuit different from that to which the receiver is connected

—Consult the dealer or an experienced radio/TV technician for help

For ISED

The device for operation in the band 5150–5250 MHz is only for indoor use to reduce the potential for harmful interference to co-channel mobile satellite systems.

The devices without detachable antenna

L'appareil destiné à fonctionner dans la bande 5150–5250 MHz est uniquement destiné à une utilisation en intérieur afin de réduire le risque d'interférences nuisibles avec les systèmes mobiles par satellite co-canal.

Les appareils sans antenne détachable

CAUTION

Risk of explosion if the battery is replaced by an incorrect type;

disposal of a battery into fire or a hot oven, or mechanically crushing or cutting of a battery, that can result in an explosion;

leaving a battery in an extremely high temperature surrounding environment that can result in an explosion or the leakage of flammable liquid or gas;

a battery subjected to extremely low air pressure that may result in an explosion or the leakage of flammable liquid or gas.

Note:In all EU member,operation of 5150–5250 MHz is restricted to indoor use only.

CE

This equipment complies with Directive 2014/53/EU radiation exposure limits set forth for an uncontrolled environment. End user must follow the specific operating instructions for satisfying RF exposure compliance. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.The portable device is designed to meet the requirements for exposure to radio waves established by European Union market (France).

SAR statement

This equipment complies with FCC/ISED radiation exposure limits set forth for an uncontrolled environment. End user must follow the specific operating instructions for satisfying RF exposure compliance. This transmitter must not be co-located or operating in in conjunction with any other antenna or transmitter.

The portable device is designed to meet the requirements for exposure to radio waves established by the ISED. These requirements set a SAR limit of 1.6 W/kg averaged over one gram of tissue. The highest SAR value reported under this standard during product certification for use when properly worn on the body.

Declaration DAS

Cet équipement est conforme aux limites d'exposition aux rayonnements FCC/ISED définies pour un environnement non contrôlé. L'utilisateur final doit suivre les instructions d'utilisation spécifiques pour satisfaire à la conformité en matière d'exposition RF. Cet émetteur ne doit pas être placé à proximité ou fonctionner en conjonction avec une autre antenne ou un autre émetteur.

L'appareil portable est conçu pour répondre aux exigences d'exposition aux ondes radio établies par l'ISED. Ces exigences fixent une limite DAS de 1,6 W/kg en moyenne sur un gramme de tissu. La valeur DAS la plus élevée signalée dans le cadre de cette norme lors de la certification du produit pour une utilisation lorsqu'il est correctement porté sur le corps.

The highest SAR value for the device as reported to the FCC&ISED when tested for use at the Handheld is 1.982W/kg and when worn on the body, as described in this user guide, is 0.769W/kg (Body-worn measurements differ among devices, depending upon available enhancements and FCC/ISED requirements.) While there may be differences between the SAR levels of various devices and at various positions, they all meet the government requirement.

La valeur de das la plus élevée pour l'appareil, telle que rapportée au FCC&ISED lorsqu'il est testé pour une utilisation à la main, est de 1,982w /kg et lorsqu'il est porté sur le corps, comme décrit dans ce guide de l'utilisateur, est de 0,769w /kg (les mesures portées sur le corps diffèrent d'un appareil à l'autre, en fonction des améliorations disponibles et des exigences de la FCC/ISED.) Bien qu'il puisse y avoir des différences entre les niveaux de das des divers dispositifs et à divers postes, ils répondent tous aux exigences du gouvernement.

For body worn operation, this device has been tested and meets the FCC/ISED RF exposure guidelines for use with an accessory that contains no metal and the positions the handset a minimum of 5mm from the body. Use of other enhancements may not ensure compliance with FCC/ISED RF exposure guidelines.

Pour le fonctionnement utilisé par le corps, cet appareil a été testé et répond aux directives d'exposition RF FCC/ISED pour une utilisation avec un accessoire qui ne contient pas de métal et qui place le combiné à un minimum de 5mm du corps. L'utilisation d'autres améliorations peut ne pas assurer la conformité aux lignes directrices sur l'exposition aux RF de la FCC/ISED.

Quick Start Guide

AP3880P

Product Details

Printer Paper Cabin

NFC Recognition Area

Magnetic Card Reader

Camera(optional)

Power key

Screen

IC Card Slot

Indicators

Multifunction key

Charging Interface

Camera

Speaker

Charging Base Connector

Battery Cabin

1.Printer Paper Cabin: to insert printing paper

2.NFC Recognition Area: to recognize NFC card

3.Magnetic Card Reader: to swipe magnetic Card

4.Power key: long press to power on/off; short press to activate or shut down the screen

5.Screen: display and touch operation

6.IC Card Slot: to swipe IC card

7.Charging Interface: to insert USB -C plug of charger

8.Multifunction key: Press this button to scan or turn on the rear camera

9.Indicators: indicating terminal working status

10.Camera: scanning and photography

11.Speaker: to play sound

12.Charging Base Connector: to connect with the charging base

13.Battery Cabin: to place and protect the battery

Main Specifications

Operation System	Android OS
CPU	Qualcomm Quad-Core
Communications	TDD/FDD/WCDMA/HSPA/GSM/EDGE/WIFI2.4+5G/

Safety Alert

Do not place the terminal in extremely hot or cold conditions.

Do not place terminal together with computer disc, credit card, travel card or any other magnetic items; otherwise, the information stored in magnetic cards will be affected.

Do not place the terminal in fire.

Do not disassemble the terminal or any accessories by yourself.

Please use a moist and anti-static cloth to clean the terminal screen.

Warning: Please replace the batteries with the same type and rating to avoid battery explosion.

Do not expose the battery in strong direct sunlight, near heat sources or any similar conditions.

Please recycle or dispose of old, weak, or worn batteries in accordance with local, regional, or national law or regulation.

Do not use detergent with chemical or scrub particle which may damage the terminal body or screen.

Please keep the terminal in a safe place and avoid crush or squeeze that may cause a damage on screen or camera.

When the user use the third party's root tool or update with unauthorized operation system, it will bring risk to the normal operation system.

The maximum operating temperature of the product should not exceed 40°C.

Product battery should not be placed in an overheated environment (over 60°C).

To prevent potential electrical damage ,please be recommended to use the power adapter and the USB cable provided with the packing only.

Important Notes

If the device has been left unused for over 6 months, it needs to be fully charged before using.

In order to extend the battery life, for the first two times, it is recommended to use the device until the battery runs out of power before recharging.

Certificate Warning
