Safety Precautions

Warning

- **When driving, the driver shall not operate....**
The driver must park the vehicle in a safe place before operating the system.
- **When driving, the driver must not read the navigation map...**
Please refer to the voice prompts and follow the actual traffic laws in driving.
- **When driving, the driver must not watch the display of this unit....**
Or the conditions at front of the vehicle may be neglected that may result in traffic accidents.
- **Please follow the actual traffic laws to drive when using the navigation system as route guide or voice prompt...**
If you drive only as per the route guided by the navigation system, you may violate the actual traffic laws that may result in traffic accidents.
- **Do not use the equipment for a long time when the engine is off...**
Or it will cause loss of electricity to the vehicle battery.
- **Do not dismantle or modify this unit...**
Or it may trigger accident, fire or electric shock.
- **Do not use the unit under such failure conditions as no display or no voice play...**
Or it may trigger accident, fire or electric shock. Contact NISSAN dealers.

- **Stop using it immediately when there is any foreign object, water spill, smoke or bad smell and contact designated NISSAN dealers...**
Continuous use may trigger accident, fire or electric shock.

Caution

- **The volume during driving shall be adjusted so that the sound outside the vehicle can be heard.**
Or it may cause accidents.
- **Pay full attention to operating this unit while driving so that safe driving is not affected...**
Or it may affect driving and cause accidents.
- **Do not use this unit for any purpose other than in the vehicle...**
Or it may result in injuries or accidents.
- **Never continue to use the unit in accidents...**
Cut off the unit power supply if smoke, abnormal noise or smell is found.
- **If the temperature inside the vehicle is high, use the unit after the temperature is lowered ...**
Or it may result in failure.
- **Do not exert force on the screen**
Or it may result in failure.
- **Please follow the actual road traffic lights to drive when using the navigation**
Map contents may not be completely accurate due to traffic development. Please keep in touch with the NISSAN Car dealers for timely update of map data.

Warning

- Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE:

- This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device must not be co-located or operating in conjunction with any other antenna or transmitter.

To comply with FCC's and Industry Canada's RF radiation exposure limits for general population/uncontrolled exposure, this device must be installed to provide a separation distance of at least 20cm from all persons."

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions :

- This device may not cause harmful interference, and
- This device must accept any interference received,

including interference that may cause undesired operation.

Radio

- The phenomenon of occasionally not receive radio station broadcast, noises or crosstalk during driving may be caused by road conditions, weather or environmental reasons.

USB

Not all USB memory devices are compatible with this unit due to different USB memory device models.

Bluetooth

- Not all mobile phones are compatible with this unit due to different mobile phone models and functions.

Disc

- In cold or rainy days, water droplets may form inside the equipment as mist may condense on the window glass.
- This (condensation) will result in distortion or failure in playing. Please wait for a moment and use the equipment after ventilation or dehumidification.

- In order to protect the internal structure of the player, the player will stop playing automatically for protection when something abnormal occurs during the playing. If the machine can't operate normally even if you operate as per the displayed instructions, the machine may have malfunctions and you should contact NISSAN dealers.
- Distortion may occur if the vehicle is driven on the road of harsh conditions or is vibrated violently.
- MP3/WMA music files stored in CD-ROW/CD-R/CD-RW may be played.
- Because of the characteristics, scratches, stains on the CD/SACD/CD-ROM/CD-R/CD-RW disc or long-time use inside the vehicle, the disc may not be played due to the worsening disc performance. The disc mentioned above can't be played if it has been finally treated or written in UDF format.
- Music CD should be officially identified.
- This unit does not support 8-cm disc.
- Do not use any disc with transparent or translucent data reading side as it can't be inserted, taken out or played normally.
- Please do not use any disc that is not from the legitimate manufacturer.

■ Disc Storage

- Do not expose the disc to direct sunlight and make sure to put it inside the box, or the disc will deform and

can't be used.

- No paper slip should be adhered to the playing side or identification side of the disc or it will cause failure.
- Do not use any disc with crack or deformation, or it will cause failure.
- Do not touch the playing side of the disc (which is the smooth side with rainbow colours) when holding the disc, or fingerprints will be left on the disc surface that may cause skipping.
- Playing a stained disc may result in disc scratch or skipping. Use disc cleaning agent available on the market to remove the stains on the disc by wiping softly from the inside to the outside.

■ Use of New Disc

- When a new disc is used, there might be some burrs at the inner edge and outer of the disc that shall be removed with a ball pen or other means. Or the bur will adhere to the playing side of the disc that may cause skipping.

■ Special- Shaped Disc

- Do not use any leased disc with glass film, lease label or other adhesive. If such disc is played in the player, it will be hard to get it out and may result in failure.

■ Disc of Special Shape

- No disc in the shape of heart or octagon may be played

or the machine will be damaged. Do not use such kind of discs.

■ Disc Decoration

- Do not use any decoration to improve tone quality or protect disc (such as disc case or protective case) as the change in the thickness or dimension of the disc may result in failure.
- Do not use any decoration to improve tone quality or shockproof performance (such as disc ring case or functional protective case), or the decoration may fall inside the machine that the disc can't be played or taken out and result in failure.

LCD

- There will be brightened or darkened visual phenomenon if you watch the LCD from the sides.
- The screen will become illegible under direct sunlight or external light on the display.
- If the machine is turned on when the temperature is below zero, LCD will appear to be darker than usual until the temperature inside the machine rises.

Names of Various Parts Panel Buttons

- ① LCD(touch screen): To display the working statuses of various modes.
- ② SD card slot: Map SD card.
- ③ [**CAMERA**] button: To enter camera mode.
- ④ [▶▶]Next Track button: In SB/iPod/Bluetooth Audio Device mode, short press it to select the next track to play, and long press it to Fast Forward; in AM/FM mode, short press to search radio station frequency up manually.
- ⑤ [◀◀]Previous Track button: In USB/iPod/ Bluetooth Audio Device mode, short press it to select the previous track to play, and long press it to Fast Reverse; in AM/FM mode, short press to search radio station frequency down manually.
- ⑥ [↶BACK] button: Back to the previous mode.
- ⑦ [TUNE SCROLL] knob/[PUSH/SOUND] button: Rotate

to jump to previous or next touch key in the general mode; press and rotate the knob to adjust the sound effect or tone quality. Rotate to zoom in or out the map in the map mode.

- ⑧  button/[VOL] knob: Rotate to adjust volume; short press to turn off/on audio device.
- ⑨ [AUDIO] button: To enter audio selection screen or Audio Mode.
- ⑩  Day/night button: Press to switch between day or night mode.
- ⑪ [MAP] button: Press to enter the map screen.
- ⑫ [MENU] button: Press to enter Menu Screen to select audio function or navigation function.

 Caution

- It is prohibited to pull out the map SD card or the system will not work.

Basic method of use

Switching the language

When the unit turns on, the default language is set to English. Switch to your language to use the unit.

- ① Press **[MENU]** button on the panel.
- ② Touch  to enter Settings Screen.

- ③ Touch  or slide the screen.
- ④ Touch  **Language & Units**.
- ⑤ Select the language and unit you use.

Setting the time

- ① Press **[MENU]** button on the panel.
- ② Touch  to enter Settings Screen.

- ③ Touch  **Clock**.
- ④ Set the clock you need.

Mode Switch

■ Switch to navigation mode

Press **[MAP]** button on the panel to switch to navigation mode for map display.

■ Switch to Bluetooth mobile phone mode

Touch  switch to Bluetooth

mobile phone mode.

■ Switch to source mode

Press **[AUDIO]** button on the panel or touch  to switch to source mode such as Radio mode.

Press **[AUDIO]** button or touch  in Source mode to switch to source selection screen.

Basic Operations

Main menu operations

On main menu screen you can enter corresponding work mode by touch the icons on the screen.

- ① Press **[MENU]** on the panel or touch  to enter main menu screen.

- Change page by dragging left or right or touch  and .

Adjust Volume

- ① Turn the **[VOL]** knob on the panel to adjust the volume.
- Source mode: Adjust the volume of source.
- Bluetooth Mobile Phone mode: Adjust the incoming call ringtone volume when receiving a call, adjust the outgoing call ringtone volume when making a call, or adjust the call volume when speaking on the phone.
- Map navigation: Adjust Voice Guidance volume when voice guidance interrupt.
- Parking guidance: Adjust parking guidance volume in parking guidance.

For example, turn the volume knob in Source USB mode to adjust the volume as shown below.

- Turn the knob clockwise: volume up.
- Turn the knob counter clockwise: volume down.

Audio On/Off

When the radio or media player is ON, you can turn off the Audio device.

- ① Short press  button to turn off Audio.
- ② Short press  button again to resume playing.

Day/Night Display Mode Switch

This can switch the screen display mode.

- ① Press  button on the panel to switch between day and night.

Basic Settings

- ① Press **[MENU]** button on the panel.

- ② Touch  to enter Settings Screen.

Bluetooth Settings

Pair Bluetooth Mobile Phone or Bluetooth Audio Device / check the list of paired equipment/Set Bluetooth system of this unit.

NOTE:

* Pairing method of some mobile phones or audio devices may differ or fail for Bluetooth pairing due to different types of mobile phones and audio devices.

- ① Touch **Bluetooth** to enter Bluetooth setting screen.

- When there is no Bluetooth pairing equipment record, the items “**Connect with Bluetooth**” and “**Select Device**” will be invalid.
- ② Touch **Bluetooth** to turn Bluetooth On or Off.
 - ③ Touch **Connect Device** to Select the mobile phone or audio device to connect. You can operate as per the information prompted.
 - ④ Touch **Select BT Device** to view and select BT Device.
 - ⑤ Touch **Edit Bluetooth Information** to edit Bluetooth information.

Phone settings

You can confirm and view various information concerning about the Bluetooth phone.

Note:

Before setting phone you need to

pair the mobile phone with this unit.

- ① Touch **Phone** to enter Phone setting screen.

- ② Touch **Quick Dial** to edit and delete Quick Dial number.
- ③ Touch **Call History** to view Call History records.
- ④ Touch **Phonebook** to download Phonebook.
- ⑤ Touch **Volume** to set Volume.
- ⑥ Touch **Auto Downloaded** to turn the Auto Downloaded on or off.

Audio Settings

To set various sound effects.

- ① Touch **Sound** to enter Audio setting screen.

- ② Touch **[-]**, **[+]**, **[L]**, **[R]**, **[R]** or **[F]** to adjust the tone quality.

Display Adjustment

Adjust the display effect of the screen.

- ① Touch **Display** to enter Display Adjustment screen.

- ② Touch **Display**, the screen display can be switched off to enter power save mode.

- After the screen display is OFF, the buttons on the panel are still operational. Press **[☀/☾]** button on the panel will resume the previous source play screen or map navigation screen. Or you can press any button for the corresponding operation.

- ③ Touch **Brightness** to enter brightness adjustment screen.

- Touch **[-]** or **[+]** to adjust the brightness of display.

- ④ Touch **Contrast** to enter contrast adjustment screen.

- Touch **[-]** or **[+]** to adjust the contrast of display.

- ⑤ Touch **Background Color** to enter back-

ground colour adjustment screen.

- Touch **Day** or **Night** to change the background colour.

Volume and Beeps

Adjust the Audio volume/Guidance volume/ Ringtone/ Incoming Call/ outgoing Call/NissanConnect Svcs, turn On or Off the button beeps and guidance voice.

- ① Touch **Volume & Beeps** to enter Volume & Beeps screen.

Next page

- ② Touch or to adjust the volume.
- ③ Touch **Button Beeps** to turn on or off button beeps.
- ④ Touch **Guidance Voice** to turn on or off guidance voice.

Edit menu

- ① Touch to enter Edit menu screen.

- ② Touch to delete the quick

menu.

- ③ Touch to add the quick menu.
- ④ Touch the quick menu to rearrange it.
- ⑤ Touch **Save** to save the settings.

Voice Recognition settings

- ① Touch to enter Voice Recognition settings screen.

- ② Touch **Minimize Voice Feedback** to turn on or off Minimize Voice Feedback.
- ③ Touch **Audio device setting** to enter the Audio device setting screen and you can activate the device by pressing "Yes" on the pop-up screen displayed upon connecting the media device.

Apple CarPlay settings

The connected device supports Ap-

ple CarPlay. Once Apple CarPlay is started, some NissanConnect features will be replaced or disabled by CarPlay including : NissanConnect Apps, iPod on USB Hands Free phone, Bluetooth Audio and navigation guidance on the Vehicle Information Display.

- ① Touch to enter Apple CarPlay settings screen.

- ② Touch **Always Start Apple CarPlay** to turn on or off Always Start Apple CarPlay.
Turn on: the connected iPhone supports Apple CarPlay. When you connect an iPhone you can start Apple CarPlay by pressing "Yes" on the pop-up screen displayed.
Turn off: the connected iPhone only supports iPod.
- ③ Touch **Nissan's Help for Apple CarPlay** to

displays Apple CarPlay Help information.

Source Media Mode

- ① Press **[AUDIO]** button on the panel or touch  to enter source screen.

FM/AM mode

- ① Touch **AM** / **FM** to enter FM/AM screen.

- ① Back to source screen.
- ② View station list, RDS Info and turn on or off HD radio mode.
- ③ Preset channel list (Station list). Up to 12 channels can be saved.

SXM mode

Before to enter this mode you need to check the antenna.

- ① Touch **SXM** to enter SiriusXM screen.

- ① Channel category.
- ② Channel name.
- ③ Artist name.
- ④ Song title.
- ⑤ Save the favorite channel by artist or song alert.
- ⑥ Preset channel list (Station list). Up to 18 channels can be

saved.

- ⑦ Switch the play mode between replay and live.
- ⑧ SiriusXM signal intensity.
- ⑨ View track list by kinds of categories etc.
- ⑩ Back to source screen.

USB mode

- ① Touch **USB/iPod** to enter USB audio screen when you connect a USB.

- ① Back to source screen.
- ② Select the folder and track, turn on or off the display of album artwork.
- ③ Turn on or off repeat play.
- ④ Short touch: switch to Previous Track; Long touch: Fast Backward.
- ⑤ Touch to Play/Pause
- ⑥ Short touch: switch to next Track;

Long touch: Fast Forward.

- ⑦ Turn on or off shuffle play.

iPod mode

- ① Touch **USB/iPod** to enter iPod audio screen when you connect an iPod.

- ① Back to source screen.
- ② Select the track from playlist, artists, albums, songs, podcasts, genres, composers and audio-books; Turn on or off the Display of Album Artwork.
- ③ Turn on or off repeat play.
- ④ Short touch: switch to Previous Track; Long touch: Fast Backward.
- ⑤ Touch to Play/Pause
- ⑥ Short touch: switch to next Track; Long touch: Fast Forward.
- ⑦ Turn on or off shuffle play.

Bluetooth Audio mode

Before playing Bluetooth Audio you need to pair the audio device with this unit.

- ① Touch **Bluetooth Audio** to enter Bluetooth Audio screen.

- ① Back to source screen.
- ② View track list and select a track to play it; enter the bluetooth settings screen.
- ③ Turn on or off repeat play.
- ④ Short touch: switch to Previous Track; Long touch: Fast Backward.
- ⑤ Touch to Play/Pause
- ⑥ Short touch: switch to next Track; Long touch: Fast Forward.
- ⑦ Turn on or off shuffle play.

AUX mode

Insert the external sound device into AUX slot via the audio cable.

- ① Touch **AUX** to enter AUX mode.

- ② Choose “Low”, “Middle” or “High” input sense of auxiliary device.

Bluetooth Operation

Pair Bluetooth Device

- ① Touch **Pair Bluetooth Device** to select the mobile phone or audio device to pair.

- ② If you want to select the mobile phone to pair, touch **Yes**.

- ③ If you want to select the audio device to pair, touch **No**, and you have to edit the PIN (minimum 4 digits and maximum 16 digits) to pair the audio device.

- ④ After entering the PIN, touch **OK** and operate as per the information prompted.

- ⑤ After successful pairing, it will automatically return to Bluetooth Setting screen.

Bluetooth Telephone

- ① Touch  to enter Phone screen.

- ② Touch **Quick Dial** to edit and delete Quick Dial number.
- ③ Touch **Phonebook** to view Phonebook.
- ④ Touch **Call History** to view Call History records.
- ⑤ Touch **Dial Number** to dial phone number by keypad.
- ⑥ Touch **Text Message** to view text message.
- ⑦ Touch **Connect Phone** to connect a phone with this unit.
- ⑧ Touch **Select BT Device** to select paired phone.
- ⑨ Touch **Volume** to set Volume.

Navigation

Menu Types and Operation

■ Map menu (Menu on current location map)

Touch  on the map screen to display the Map menu at the left side of the screen. You can store the current location to the Address Book or change the map appearance.

- 1 [BACK] key: Return to the map screen.
- 2 [Save Location] key: Save the current location in the AddressBook.
- 3 [Nearby POIs] key: Displays the Category screen of the POIs nearby the current location.
- 4 [Map View] key: Change the types of the screen and map appearance.
- 5 [Map Icons] key: Turn on or off the

map icons.

■ Location menu (Menu on scrolled map)

After scrolling the map by touching the Map screen, touch  on the screen to display the Location menu at the left side of the screen. You can set the location under the cursor at the centre of the screen as the destination or store it to the Address Book.

- 1 [BACK] key: Returns to the scrolled Map screen before touching the  key.
- 2 [New Destination] key: Sets the location under the cursor as the destination. When a destination is already set, the old destination is cancelled as soon as the new

destination is set.

- 3 [Add to Route] key: When another location is already set as the destination, you can set the location under the cursor as a waypoint. Touching this key displays the Edit Route screen. Specify the desired order of passing to set the location as a waypoint.
- 4 [Nearby POIs] key: Displays the Category screen of the POIs nearby the location under the cursor.
- 5 [Save Location] key: Save the location under the cursor in the Address Book.

Map Screen Features

■ Types of the map

There are two types of map: the 2D map and the 3D map. Such as the method of scrolling the map, some operation are different depending on the map types.

- 2D Map

The 2D map is a map screen represented to the plane just like the map of atlases. It is suitable for searching a destination and confirming the road or route.

● 3D Map

The 3D map is a map screen using a viewing position above the vehicle while looking in the direction of the car heading. It is suitable for understanding the image of the direction, because the perspective of the travelling direction can be adjusted as required.

■ Indicators on the map

Indicators displayed on the Map screen are different according to the conditions at that time. This section explains the main indicators displayed on the Map.

Indicators on the map of the current location

- ① Audio mark: Indicates the current source mode.
- ② Vehicle mark: Indicates the current location and direction of your vehicle.
- ③ [Map Menu] Map Menu key: Displays the Map menu.
- ④ [Map Menu] Map scale key: Touch this key to decreases/increases the map scale.
- ⑤ [Map Bearing] Map bearing mark: Indicates

the map orientation. You can switch the map orientation between Heading Up, North Up and 3D map by touching this icon.

Indicators on the scrolled map

Indicators are displayed after scrolling the map. During scrolling, only the scroll cursor is displayed on the map.

- ① [Slow] (Slow Scroll) key: Displayed only on the 2D map. Turn on the Slow scroll mode. Scroll cursor: Displayed when scrolling the map.
- ② Displays the name of the street under the cursor.

Indicators displayed during the route guidance mode

After a destination is set and travel-

ling is started, the guidance route and various guidance information are displayed on the map.

- ① Small Turn Arrow display: Displays the turning direction and distance to the next guidance point.
- ② Guidance point: Indicates the guidance point
- ③ Distance to the waypoint/destination: The distance from the current location to the next waypoint or destination are displayed.

Manipulating the Map Screen

■ Scrolling the map

Touching the Map screen displays a cursor at the centre of the screen, and you can scroll the map. For the 2D map, touch the map to move the map to the touched position, and keep touching the map to scroll the

map towards the touched direction. For the 3D map, touch the upper part of the map to scroll the map toward the touched direction, and touch the left or right part to rotate the map while touching.

■ Slow scroll mode operation

Touch **Slow** while scrolling the 2D map to display the following screen:

Keep touching the desired arrow key (↑, ↓, ←, →, ↖, ↗, ↘, ↙) moves the map slowly towards the corresponding direction. To quit the slow scroll mode, touch **Cancel**.

■ Zooming IN/OUT the map

- ① Touch **100m** to display the zoom in/out key.

- ② Touch **ZOOM IN** or **ZOOM OUT** to change the map scale.

■ Changing the map appearance

The Map screen can be adjusted regarding orientation or appearance of the map.

- ① Touch **Map Menu** on the Map screen of the current vehicle location.
- ② Touch **Map View** to enter Map View screen.

- Touch the corresponding key to change the map view.
- ③ Touch **View Settings** to display the View Settings screen.

- [Intersection]: During the route guidance mode, displays the Intersection Close-up display which displays the turning direction of the next guidance junction at the left of the screen.
- [Turn List]: During the route guidance mode, displays the list of the name, distance, and turning direction of the guidance junctions at the left of the screen.
- [Drive Report]: During the route guidance mode, displays the Drive Report.
- [Full Map]: Changes to display one map using full screen.

Screen examples

● 2D Map

● 3D Map

2D/2D Map

2D/3D Map

- ④ Touch **Map Settings** to enter Map Settings screen.

- [Map Orientation] key: Changes the orientation of the map between Heading Up and North Up.

- This control is available when [2D] is selected.
- [Long Range] key: Changes the map view to view a wider area in the direction that the vehicle is travelling. When this feature is activated, the vehicle mark is located slightly lower than the centre of the screen.
- This control is available when [2D] is selected and the Map Orientation is set to Heading-Up.
- [Map Colour] key: Selects the colours (Map Colour 1/2/3/4) of the map.
- [Map Text Size] key: Change the map text size (Large, Medium, Small).
- [Birdview Angle] key: Changes the angle of the 3D map. Touch **Raise** to raise the angle, and **Lower** to lower the angle.
- This control is available when [3D] is selected.
- [North Up when Zoomed Out] key: Turn on or off north up when zoomed.
- [Names Displayed on Map] key: Change the names of place, facil-

ity and road displayed on map.

- [Left Split Map Settings] key: Change settings of Map Orientation, Long Range and Map Scale of left split map.
- [Show all Freeway Exits on Route] key: Turn on to show all freeway exits on route.
- [Auto. Show Turn List on Freeway] key: Turn on to show turn list on freeway.

Navigation System Settings

- ① Press **[MENU]/[MAP]/[AUDIO]** button on the panel to display the function bar.
- ② Touch  **Navigation** to enter Navigation Settings Screen.

Registering/Editing the Address Book

From the Address Book, you can register the home address, addresses of facilities and places, routes, and Avoid Areas. You can also edit the data registered.

The registered places or routes can be set as the destination or as the current route.

■ Home Location

Register your home address. You can edit the registered home address.

To register the Home Location

The Home Location can be registered when the **Home Location (None)** key is displayed.

- ① Touch **Home Location (None)**.
- ② Search for the location of your home by a similar way as for entering destinations.

- ③ Touch **OK** to register it.

To edit the Home Location

- ① Touch **Edit** to enter edit Home Location screen.
- ② Touch the desired Item to edit it.
- ③ Touch **Move Location** to adjust the location by moving the cursor on

the Map screen.

- ④ Touch **Delete** to delete the registered Home location.
- ⑤ Touch **OK** to register it.

■ Stored Locations

Registers locations in the Address Book. You can register up to 200 locations, and can also edit the registered locations.

To register Location

- ① Touch **Stored Locations**.
- ② Touch **Add New**.
- ③ Search for the location you wish to register by a similar way as for entering destinations.
- ④ Touch **OK** to register it.
- ⑤ Touch **Sort** to sort the locations by number, name, icon and group.

To edit a Stored Location

- ① Touch **Stored Locations**.
- ② Touch the name of the Stored Location you wish to edit.
- ③ Refer to "To edit the Home Loca-

tion" on Page 20 to edit it.

■ Stored Routes

Registers the current route. You can register up to 5 routes, and can also edit the registered routes.

To register the current route

- ① Touch **Stored Routes**.
- ② Touch **Store Current Route**.
- ③ Then touch **Yes** from the displayed confirmation screen.

To edit the Stored Route

- ① Touch **Stored Routes**.
- ② Touch the name of the Stored Route you wish to edit.
- ③ Touch the desired item, then edit it.
 - [Rename] key: Changes the name of the Stored Route.
 - [Replace] key: Replaces the Stored Route with the current route.
 - [Delete] key: Deletes the Stored Route.
- ④ Touch **OK** to register it.

■ Avoid Area

You can register areas you do not

want to pass or areas that often get congested as an Avoid Area. When you register the Avoid Areas, you can set the system to calculate routes avoiding the registered areas. Up to 10 Avoid Areas can be registered. You can edit the registered Avoid Areas.

To register an Avoid Area

- ① Touch **Avoid Area**.
- ② Touch **Add New**.
- ③ Search the area to avoid by a similar way as for entering a destination.
- ④ Touch **OK** to register it.

To edit an Avoid Area

- ① Touch **Avoid Area**.
- ② Touch the name of the Avoid Area you wish to edit.
- ③ Touch the desired item to edit, and edit it by similar way as for registering Avoid Areas.
- [Rename] key: You can change the name of the Avoid Area. Enter the name, then touch **OK**.
- [Move Location] key: You can ad-

just the location of the Avoid Area.

- [Resize Area] key: You can change the size of the Avoid Area([Large], [*], [Medium], [*], or [Small]), then touch **OK**.
- [FWY] key: You can set whether to avoid freeway passing the Avoid Area.
- [Delete] key: Deletes the current Avoid Area.
- ④ Touch **OK** to register it.

■ Deleting the Stored Items

You can delete various data stored in the navigation system.

- ① Touch **Delete Stored Items**.
- ② Touch the item key to delete.
- [Delete Home Location] key: Deletes your home location.
- [Delete Address Book] key:
 - [Delete All]: Deletes all the stored locations.
 - [Delete 1 Entry]: Deletes only the location that you specify on the Delete One screen.
- [Delete Stored Routes] key:
 - [Delete All]: Deletes all the stored routes.
 - [Delete 1 Entry]: Deletes only the route that you specify on the Delete One screen.
- [Delete Avoid Areas] key:

- [Delete All]: Deletes all the stored avoid areas.
- [Delete 1 Entry]: Deletes only the avoid area that you specify on the Delete One screen.
- [Delete Previous Destination] key:
 - [Delete All Previous Destinations]: Deletes all the registered previous destinations.
 - [Delete Previous Destination]: Deletes only the previous destination that you specify on the Delete Previous Destination screen.
 - [Delete Previous Starting Point]: Deletes the starting point.
- ③ From the displayed confirmation screen, touch **Yes**.

■ Transfer Address Book

You can Transfer Address Book from SD card.

- ① Touch **Transfer Address Book**.
- [Export Data] key: Export data to SD card.
- [Import Data] key: Import data from SD card.

Navigation Settings

■ Map View

Please refer to “Changing the map

appearance” on Page 17 .

■ Map Icons

Switches ON or OFF Landmark icon display for each type.

- ① Touch **Map Icons**.
- ② Touch the desired item key you wish to change the setting.
- ③ The types of icons that can be set are the following 6 types.
 - [Restaurant] key
 - [Station] key
 - [Hotel] key
 - [ATM] key
 - [Rest Area] key

■ Guidance Settings

You can change settings concerning the guidance.

- ① Touch **Guidance Settings** to enter Guidance Settings screen.
- ② Touch the desired menu item to set.
 - [Guidance Volume] key: Adjusts the volume of the voice guidance.
 - [Guidance Voice] key: Sets whether to activate the voice guidance.
 - [Traffic Announcement] key: Sets

whether to read out the traffic information.

- [Intersection Guidance Settings] key: The Intersection Guidance Settings screen is displayed. You can set the intersection guidance for Level1, Level2, Level3 and Level4.
- [Estimated Time] key: Changes the setting of arrival time indication displayed on the Map screen.
- [Destination]: Sets to display the arrival time to the destination.
- [Waypoint]: Sets to display the arrival time to the next waypoint or destination.

■ Route Settings

You can change settings concerning the route guidance.

- ① Touch **Route Settings** to enter route Settings screen.

- [More Routes] key: You can change to other suggested routes with a different priority condition.
 - [Route Info] key: Shows the information of the suggested route selected on the screen.
 - [Add Waypoint] key: Adds waypoints to the suggested route displayed on the map. Up to five waypoints can be specified.
- ③ Touch **Start**.

Note:

- When you search a place far from the current location, change the map scale to search more quickly.

Route Guidance

After you have entered the destination and started the route guidance, you will be guided along the route by screen display and by voice.

Route Guidance Screen

Features

As well as the Map screen, various guidance screens are displayed during the route guidance mode according to the situation.

Pressing the [MAP] button to switch the screen between the following guidance screens and the full map screen.

■ Junction Map

When you get near to approx. 300 m or 300 yd (1 km or 1 mile for a motorway) from the next guidance point, the screen will be divided into two displays and the Junction Map will be displayed on the left display.

You can set to display the Junction Map screen always in the route guidance mode. The default setting is OFF.

Note:

- Before the Junction Map is displayed, a voice guidance will be heard at approx. 600 m or 0.4 miles (2 km or 1.3 miles for a motorway) from the next guidance point. You can change this setting by setting the Junction Guidance Settings.

- ① Remaining distance indication: Indicates the remaining distance to the next guidance point with the bar gauge.
- ② Guidance route: Indicates the direction to travel.
- ③ Guidance point: Indicates the next guidance point.

■ Turn list on Route

The screen is always divided into two displays and the Turn List on Route is displayed on the left display

if Turn List is activated. The Turn List contains the guidance points next to the vehicle position, and will change while travelling.

When you get near to the next guidance point, the left display is automatically changed to the Junction Map.

You can set to display the Turn List screen always in the route guidance mode.

1

2

- ① Turn List: The list of the guidance points and turning directions are displayed from the items near to the vehicle position, and it will change while travelling.
- ② Scrolling key: Scrolls the Turn List on Route screen.

About the Voice Guidance

After starting the route guidance, not only guidance by screen but also guidance by voice, such as the turning direction or the distance to the guidance point, will be given when you get near to the guidance point. You can set whether to use the voice guidance or not, and set the volume to be changed according to the vehicle speed.

Changing/Editing the Route Settings

From the Route menu, editing the current route, confirming the route information, setting the conditions of the route calculation, etc. can be performed.
