

Label info

The marking durability is enough to keep in the product lifetime.

ID labeling exemption

SW-UT600 cannot display FCC ID and IC number on the product because its shape makes the flat area for displaying the marking small and there is not enough space to meet the marking rule requirement except for the exterior design surface. For this reason, any other certification markings will also not display on the product. As an alternative, we will place the FCC ID and IC number on the “User manual” and “Package.”

The marking durability is enough to keep in the product lifetime.
