Subject: Equipment Authorization Application for Airlink ACSES - [FCC ID: X27-AS220-1]

To whom it may concern

This letter serves as an application for equipment authorization for the Airlink ACSES, as detailed in the attached application and supporting documentation. Airlink ACSES is a data radio transceiver designed for use in Automated Control and Signaling Systems on railroads. It operates in the 216 to 222 MHz frequency bands.

We are requesting Original Equipment authorization for this device. The device complies with Part 15 of the FCC rules, specifically Subpart B for unintentional radiators. We have conducted thorough testing to ensure compliance with FCC rules 80, 90 and 95, and the test results are included in the accompanying documentation.

This device is intended for use in Industrial environments, specifically railroads. We are confident that Airlink ACSES meets all the requirements for FCC equipment authorization.

We kindly request that you review our application and grant the appropriate authorization. Please let us know if you require any further information or clarification.

Sincerely,

A handwritten signature in blue ink, appearing to read "Guy Simpson", with a horizontal line extending to the right.
