Antenna information

1. Antenna view.

2. Antenna type.

PCB L-type Antenna-1.

3. Antenna parameters.

Frequency f_0 = 2.44 GHz

Operating frequency range: 2.402 GHz to 2.85 GHz

Antenna gain*: from 2 dBi to 3.5 dBi

Input return loss at 2.44 GHz: from -10 dB

*Antenna gain information is not required as compliance details were measured in radiated mode and therefore antenna characteristics are inherent to the measurement gain.
