Antenna information

1. Antenna view.

2. Antenna type.

PCB Loop Antenna.

3. Antenna parameters.

Frequency f_0 = 433.92 MHz

Operating frequency range: 433 MHz to 435 MHz

Antenna gain*: from -14.5 dBi to -15.5 dBi

Input return loss at 433 MHz: from -10dB

*Antenna gain information is not required as compliance details were measured in radiated mode and therefore antenna characteristics are inherent to the measurement gain.
