IMPORTANT

PLEASE READ CAREFULLY BEFORE USING

YOUR SKYGOLF GameTracker™

This Product Information Guide contains important safety, handling, and warranty information, as well as software license information, for your SkyGolf GameTracker. Please read carefully before using your SkyGolf GameTracker.

Important Safety and Handling Information

WARNING: Failure to follow these safety and handling instructions could result in fire, electric shock, or other personal injury or property damage, including damage to your SkyGolf GameTracker.

Carrying and Handling your SkyGolf GameTracker

Your SkyGolf GameTracker contains sensitive components. Do not disassemble, open, crush, puncture, shred, microwave, incinerate, or insert foreign objects into your SkyGolf GameTracker.

Avoiding Water and Wet Locations

Your SkyGolf GameTracker is designed for wet conditions that exceed those typically encountered while playing golf. Still, you should take care not

to expose your SkyGolf GameTracker to water, as too much exposure to water may cause damage, such as might happen if you drop your SkyGolf GameTracker into the water hazard while looking for your ball. If you do get your SkyGolf GameTracker wet, do not attempt to dry it with an external heat source like a microwave oven or hair dryer. SkyGolf GameTracker devices that do manage to get water damaged are generally not serviceable.

Repairing or Modifying your SkyGolf GameTracker

Never attempt to repair or modify your SkyGolf GameTracker yourself. Disassembling your SkyCaddie TOUCH will void the warranty. Your SkyGolf GameTracker does not contain any user-serviceable parts. Service should only be provided by a SkyGolf® Authorized Service Provider. If your SkyGolf GameTracker has been punctured, or subjected to a severe fall, do not use it until you contact an Authorized Service Provider. The rechargeable battery in your SkyGolf GameTracker is not user-replaceable and should be replaced by a SkyGolf Authorized Service Provider only. For service information, go to www.SkyGolf.com.

Charging your SkyGolf GameTracker

In charging your SkyGolf GameTracker, use only a SkyGolf supplied charger specifically designed for your SkyGolf GameTracker. Use of other chargers may cause personal injury and property damage, including damage to your SkyGolf GameTracker.

Read all safety instructions for any products and accessories before using your SkyGolf GameTracker. SkyGolf is not responsible for the operation of third-party accessories or their compliance with safety and regulatory standards.

When charging the battery on your SkyGolf GameTracker with an authorized SkyGolf charger designed for use with the SkyGolf GameTracker, make sure that the charger is fully assembled before you plug it into a power outlet. Do not connect or disconnect the charger with wet hands.

The charger may become warm during normal use, however, your SkyGolf GameTracker should never become hot. Always allow adequate ventilation around the charger and use care when handling. Unplug the charger if any of the following conditions exist:

- The power cord or plug has become frayed or damaged.
- The adapter is exposed to rain, liquid or excessive moisture.
- The adapter case has become damaged.
- You suspect the adapter needs service or repair.

Choking Hazards

Your SkyGolf GameTracker contains small parts, which may present a choking hazard to small children. Keep your SkyGolf GameTracker and its accessories away from children.

Using Connectors and Ports

Never force a connector into a port on your SkyGolf GameTracker. Check for obstructions on the port. If the connector and port do not join with reasonable ease, make sure that the connector and port are properly aligned before attempting to insert again.

Keeping Your SkyGolf GameTracker Within Acceptable Temperatures

Operate your SkyGolf GameTracker in a place where the temperature is between 0° and 35° C (32° to 95° F). Low or high temperature conditions might shorten battery life or cause your SkyGolf GameTracker to stop working properly. Avoid dramatic changes in temperature or humidity when using your SkyGolf GameTracker and store it in a cool, dry place at room temperature.

Exposure to Radio Frequency Energy

Your SkyGolf GameTracker contains radio transmitters and receivers, much like cell phones, pagers and other similar devices. When on, your SkyGolf

GameTracker sends and receives radio frequency (RF) energy through its antenna.

The SkyGolf GameTracker can emit radio waves that can affect the operation of nearby electronics, including cardiac pacemakers.

- Do not use the SkyGolf GameTracker within 9 inches of a pacemaker.
- If you have a pacemaker or other implanted medical device, do not use the SkyGolf GameTracker without first consulting your doctor or the manufacturer of your medical device. Your SkyGolf GameTracker has been tested and meets the SAR exposure requirements for Bluetooth® operation. Your SkyGolf GameTracker is designed and manufactured to comply with applicable limits for exposure to RF energy.

Additional Information

For more information from the FCC about exposure to RF energy, see: www.fcc.gov/oet/rfsafety

The FCC and the U.S. Food and Drug Administration (FDA) also maintain a consumer website at www.fda.gov/Radiation-EmittingProducts/default.html to address inquiries about the safety of radio emissions. Check the website periodically for updates.

For information about the scientific research related to RF energy exposure, see the EMF Research Database maintained by the World Health Organization at: www.who.int/emf
