

Swiftpoint®GT

Quick Start Guide

Charging the Mouse

To charge your Swiftpoint GT:

1. Plug the USB charger into a USB port on your computer or into a USB charging accessory.
2. Dock the mouse onto the charger.

The battery LED will flash while charging and turn off once fully charged. A full charge can take up to 90 minutes.

To begin using the mouse, move the switch on the underside to the ON position.

Connecting the Mouse Via USB Receiver

To connect via the USB charger/receiver, plug the USB charger/receiver into a port on your computer and move the switch on the underside of the mouse from the OFF to the ON position. The mouse will automatically connect to your computer.

Connecting the Mouse Via Bluetooth 4.0

Once the mouse is fully charged, you can pair it to your computer via Bluetooth 4.0. Remove the USB charger/receiver. Leave the mouse OFF for the first steps.

For Windows 8 or 8.1

1. Bring up the Charms menu by moving the pointer to the bottom right corner.
2. Select **Settings**, then **Change PC Settings**.
3. Then:

Windows 8

Select **Devices**, then **Add a Device**.

Windows 8.1

Select **PC & Devices**, then **Bluetooth** from the column on the left.

4. Remove any existing "Swiftpoint GT" in the list by selecting it, then selecting **Remove**.
5. While holding down either mouse button, move the switch on the underside of the mouse to ON. The LED will flash to indicate pairing mode.
6. When "Swiftpoint GT" appears in the list of searched devices, click on the device name to install and pair with the device.

For Other Devices

Make sure your computer or device is ready to pair. Next, put the Swiftpoint GT into pairing mode. To do this, hold down either mouse button, then move the switch on the underside of the mouse from OFF to ON. The LED will flash to indicate pairing mode.

If you connect your Swiftpoint GT via Bluetooth, you can plug the USB charger/receiver into a USB charging accessory rather than using one of your computer's USB ports.

Recharging

When not using the mouse for brief periods, dock the mouse on the USB charger so it maintains a charge. The first 30 seconds of charging will give you up to one hour of use. During this RapidCharge™, the LED flashes rapidly.

When not using the mouse for extended periods, move the switch on the underside of the mouse to OFF.

Accessories

Apply the **palmrest sticker** to the palmrest of your laptop. Rest the mouse on the shaded corner, and the mouse's magnet will hold it in place while typing.

Sit the mouse on the **parking spot** and it will be held in place. Apply the parking spot to any handy place, such as your laptop lid.

Using the Mouse

Hold the mouse with your thumb on the thumb grip and your middle finger on the finger grip. Rest your index finger on the front button.

- To right-click, move your index finger to the rear button.
- Use your index finger to roll the scroll wheel.

To middle-click, hold the front button, then click the rear button.

To open the Windows Start screen, hold the rear button, then click the front button.

To gesture, tilt the mouse as shown to engage the stylus, then drag the stylus on the mousing surface.

To perform edge gestures (Win 8), hold the rear (right-click) button and engage the stylus:

- Drag right to left to bring up Charms.
- Drag left to right to bring up the application switcher. Lift the stylus to launch an application.
- Drag up or down to zoom, depending upon the application being used.

Configuring the Swiftpoint GT (Win 8)

To adjust configuration settings for your Swiftpoint GT:

1. Move the switch on the underside of the mouse to CONFIG.
2. Follow the on-screen instructions.
3. Once configured, slide the switch to ON.

The Gesture Technology Driver accesses more gestures. Extra gestures include:

- Go backward and forward in Internet Explorer with left and right flicks.
- Pan in Microsoft Excel by dragging left and right.
- Pan in Bing maps by dragging.

The Gesture Technology Driver also provides inertia and spring-back behaviours.

To install the driver:

1. Move the switch on the underside of the mouse to CONFIG.
2. Follow the on-screen instructions.
