Preface

Dear User,

We are delighted that you have chosen a LINAK® product.

LINAK systems are high-tech products based on many years of experience in the manufacture and development of actuators, lifting columns, desk frames, electric control boxes, controls, batteries, accessories and chargers.

This User Manual does not address the end user. It is intended as a source of information for the equipment or system manufacturer only, and it will tell you how to install, use and maintain your LINAK electronics. The manufacturer of the end product has the responsibility to provide a User Manual, where relevant safety information from this manual is passed on to the end user.

We are convinced that your LINAK product/system will give you many years of problem-free operation.

Before our products leave the factory, they undergo both function and quality testing. Should you, nevertheless, experience problems with your product/system, you are always welcome to contact your supplier.

LINAK subsidiaries and some distributors situated all over the world have authorised service centres, which are always ready to help you. Locate your local contact information on the back page.

LINAK provides a warranty on all products. (See warranty section).

This warranty, however, is subject to correct use in accordance with the specifications, maintenance being done correctly, and any repairs being carried out at a service centre, which is authorised to repair LINAK products.

Changes in installation and use of LINAK systems can affect their operation and durability. The products may only be opened by authorised personnel.

This User Manual has been written based on the present technical knowledge. LINAK reserves the right to carry out technical modifications and keeps the associated information updated.

LINAK A/S

Terms of use

LINAK® takes great care in providing accurate and up-to-date information on its products. However, the user is responsible for determining the suitability of LINAK products for a specific application.

Due to continual development, LINAK products are subject to frequent modifications and changes. LINAK reserves the rights to conduct modifications, updates, and changes without any prior notice. For the same reason, LINAK cannot guarantee the correctness and actual status of imprinted information on its products.

LINAK uses its best efforts to fulfil orders. However, for the reasons mentioned above, LINAK cannot guarantee availability of any particular product at any given time. LINAK reserves the right to discontinue the sale of any product displayed on its website or listed in its catalogues or in other written material created and produced by LINAK, LINAK subsidiaries, or LINAK affiliates.

All sales are subject to the 'Standard Terms of Sale and Delivery for LINAK A/S' available on LINAK websites.

LINAK and the LINAK logotype are registered trademarks of LINAK A/S. All rights reserved.

Introduction

Extremely powerful linear actuator made by LINAK. Up to 6,800 N thrust, or up to 160 mm/s. Designed to operate in extreme conditions. Solid choice for industrial and agricultural applications.

Safety instructions

Please read this safety information carefully.

Be aware of the following three symbols throughout the document:

Warning!

Failing to follow these instructions can cause accidents resulting in serious personal injury.

Recommendations

Failing to follow these instructions can result in the actuator suffering damage or being ruined.

Additional information

Usage tips or additional information that is important in connection with the use of the actuator.

Furthermore, ensure that all staff who are to connect, mount, or use the actuator are in possession of the necessary information and that they have access to this user manual.

Persons who do not have the necessary experience or knowledge of the product/products must not use the product/products. Besides, persons with reduced physical or mental abilities must not use the product/products, unless they are under surveillance or they have been thoroughly instructed in the use of the apparatus by a person who is responsible for the safety of these persons.

Moreover, children must be under surveillance to ensure that they do not play with the product.

Before you start mounting/dismounting, ensure that the following points are observed:

- The actuator is not in operation.
- The actuator is free from loads that could be released during this work.

Before you put the actuator into operation, check the following:

- The actuator is correctly mounted as indicated in the relevant user instructions.
- The equipment can be freely moved over the actuator's whole working area.
- The actuator is connected to a mains electricity supply/transformer with the correct voltage and which is dimensioned and adapted to the actuator in question.
- Ensure that the voltage applied matches to the voltage specified on the actuator label.
- Ensure that the connection bolts can withstand the wear.
- Ensure that the connection bolts are secured safely.

During operation, please be aware of the following:

- Listen for unusual sounds and watch out for uneven running. Stop the actuator immediately if anything unusual is observed.
- Only use the actuator within the specified working limits.
- Do not step on or kick the actuator.

When the equipment is not in use:

- Switch off the mains supply in order to prevent unintentional operation.
- Check regularly for extraordinary wear.

Classification

The equipment is not suitable for use in the presence of a flammable anaesthetic mixture with air or with oxygen or nitrous oxide.

**Warnings**

- Do not sideload the actuator.
- When mounting the actuator in the application ensure that the bolts can withstand the wear and that they are secured safely.
- If irregularities are observed, the actuator must be replaced.
- The standard actuator (without Integrated Controller) without clutch, is not allowed to run into a mechanical block -before reaching the end of stroke.

**Recommendations**

- Do not place load on the actuator housing.
- Prevent impact or blows, or any other form of stress to the housing.
- Ensure that the cable cover is mounted correctly. Use 3.5 Nm torque.
- Ensure that the duty cycle and the usage temperatures for LA36 actuators are respected.
- Ensure that the cable cannot be squeezed, pulled or subjected to any other stress.
- Furthermore, it will be good practice to ensure that the actuator is fully retracted in the “normal” position. The reason is that there will be a negative pressure inside the actuator if it is extended which over time can lead to water entering the actuator.

**Warning**

This ATEX User Manual is an appendix to the Product User Manual - applicable for ATEX/IECEX/CCC approved actuators only. All information not regarded to ATEX/IECEX/CCC will be found in the Product User Manual.

If there should be any differences between the Product User Manual and this document, regarding to ATEX, -this document is valid.

Note that this product is NOT to be used within flammable gas filled environments.

Features

- 12, 24, 36 or 48 V DC permanent magnetic motor (IC only 12/24 V DC)
- Load from 500 N - 6.800 (depending on gear ratio and spindle pitch)
- Max. speed 160 mm/sec. (depending on gear ratio and spindle pitch)
- Stroke length from 100 to 1200 mm
- Built-in endstops reached function
- Highly efficient acme thread spindle
- Heavy duty aluminium housing for harsh conditions
- Protection class: IP66 for outdoor use (dynamic). Furthermore, the actuator can be washed down by a high pressure cleaner (IP69K - static)
- Hand crank for manual operation
- Integrated brake with high self-lock ability
- Endplay: see [Technical Specifications](#)
- Non-rotating piston rod eye
- Noise level: 76 dB (A). Measuring method: DS/EN ISO 3746 (actuator not loaded)
- Off-highway Features:
 - 12 or 24 V DC brushed permanent magnetic motor
 - Load from 1,700 N - 6,800 N (depending on gear ratio and spindle pitch)
 - Max. speed 7 mm/sec. to 100 mm/sec. (depending on gear ratio and spindle pitch)
 - Reinforced aluminium housing for harsh conditions
 - IPC-A-610 Class 3 (High-performance electronic products)
 - IP54 without cable mounted
IP69K (static) with cable mounted with shell or moulded cable

An Off-highway vehicle is intended for use on steep or uneven ground and includes those used for construction or agriculture. They are specifically designed for off-road use.

Quad bikes, dirt bikes, dune buggies and other types of all-terrain vehicles are also types of Off-highway vehicles, although their function is very different from motor vehicles designed for industrial and farming use.

Options in general

- Back fixture can be ordered in steps of 30 degrees
- Exchangeable cables in different lengths
- Hall effect sensor
- Analogue or digital feedback for precise positioning
- Endstop reached signals
- Mechanical overload protection through integrated slip clutch -Standard actuators only
- Mechanical potentiometer (not applicable with IC)
- When ordering AISI (304 and up) piston rod eye and back fixture, stainless steel screws are automatically included
- Special anodised housing for extreme environments -see paragraph regarding 'Special anodised housing'
- Adjustable magnetic sensors for endstop signals (code no. 1017031)
- IC options including:
 - I/O
 - Ethernet/IP
 - Modbus TCP/IP
 - Modbus RTU
 - IO-Link
 - LIN bus
 - CAN SAE J1939
 - CANopen
 - Off-highway LIN bus
 - Off-highway CAN SAE J1939
 - Off-highway CANopen

See specific interface user manuals at the [TECHLINE webpage](#) for Connection Diagrams and I/O specifications

- PC configuration tool (BusLink or Actuator Connect™)
- ATEX/IECEX/CCC (Ex) certified for Zone 21 (Not applicable for Off-highway actuators)

Usage

- Duty cycle up to 600 mm stroke: max. 20% (4 min. drive and 16 min. rest)
- Duty cycle at 601-999 mm stroke: max. 15% (3 min. drive and 17 min. rest)
- Duty cycle at 1000-1200 mm stroke: max. 10% (2 min. drive and 18 min. rest)
- Ambient operating temperature (AOT): Full performance from +5°C to +40°C
-30°C (reduced load 50%) to + 85°C (reduced duty cycle 10%)
-40°C (no load)
- AOT for ATEX/IECEX/CCC: -25°C to +65°C
- Storage temperature: -40 °C to +70 °C
Actuator is not activated/
connected
-40°C to +85°C for 72 hours
-55°C to +95°C for 24 hours for Standard platform
-55°C to +105°C for 24 hours for Integrated Control platform
Acclimatization before usage.
- Relative humidity: Full performance from 20 % to 80 % - non-condensing
(Actuator is neither activated nor connected)
- Cyclic state: 93 % to 98 % - non-condensing +25°C to +55°C for 12 hours
- Steady state 93 % to 95 % - non-condensing +40°C for 56 days
- Atmospheric pressure: 700 to 1060 hPa
- Meters above sea level: Max. 3000 meters
- Off-highway:
 - For applications operated at constantly low temperatures it might be beneficial to recommend a stronger version of the actuator to reduce the current consumption that in some combinations can be up to 3 times higher (at -40° Celsius)
 - Testet according to: ISO14982-1 / Agricultural and forestry machinery - Electromagnetic compatibility - Part 1: General EMC requirements (clamped capacitor circuit)
 - Compliant with: ROHS2 : 2011/65/EU: Directive on the restriction of the use of certain hazardous substances in electrical and electronic equipment EMC Directive - 2014/30/EU

FCC Statement:

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, Pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator and your body.

The typical values below are made with a stable power supply and an ambient temperature of 20°C.

The typical values below are made with a stable power supply and an ambient temperature of 20°C.

The typical values below are made with a stable power supply and an ambient temperature of 20°C.

The typical values below are made with a stable power supply and an ambient temperature of 20°C.

The current limiting algorithm

The I/O™ actuator features the latest current limiting algorithm, which has been significantly improved compared to previous versions.

If the actuator's current consumption rises above the set limit, the actuator regulates and tries to keep it below the set current limit by reducing the PWM and therefore also the speed accordingly. The actuator does this continuously, until the actuator stops moving (mechanically blocked) - something that is determined by monitoring the Hall feedback signal. If there are no changes to the Hall feedback signal during the set time frame, the integrated controller will cut power to the h-bridge motor circuit.

If the actuator is stopped due to the above-mentioned criteria, it automatically drives slightly in the opposite direction to reduce the torque in a blocking situation.

This is visualised in the figure below:

This control feature makes it possible to avoid loading the internal mechanical system of the actuator above its specification, which ultimately means a longer life for the actuator, especially in an abuse scenario.

The I/O™ actuator comes with factory default current limits. These values can be customised with the 'Protection' option in Actuator Connect™ or when ordering the actuator.

Current limits

As described in the algorithm on previous page

Platform		12 V	24 V	48 V	Reference temperature: 0°C
B3 C3 F3	I/O Basic I/O Customised I/O Full	26 A	13 A	8 A	Above
		26 A	26 A	13 A	Below
0B	IO-Link	-	16 A	-	Above
		-	26 A	-	Below
14	Modbus RTU	-	16 A	8 A	Above
		-	26 A	15 A	Below
A7 A8	CANbus J1939 CANopen	-	13 A	8 A	Above
		-	26 A	13 A	Below
0E 2E 5E	Modbus TCP/IP Ethernet Profinet	-	16 A	8 A	Above
		-	26 A	16 A	Below
C6 D6 E6	Off-highway: LIN bus CAN SAE J1939 CANopen	26 A	13 A	-	Above
		26 A	26 A	-	Below

Max. Current

The current in not limited by the actuator below is the anticipated consumption at max. load.
See: Recommended fuse for actuators without Integrated Controller

Platform		12 V	24 V	36 V	48 V	Reference temperature: 0°C
00, 01	Standard	26 A	13 A	10 A	8 A	Above
	Standard with power switch	26 A	13 A	10 A	8 A	Below

Current cut-offs

The principle behind the current cut-off measurement is an 'above limit' and a 'below limit' accumulating counter. When the time-out counter reaches a specific value the current cut-off goes into effect. The time-out value is pre-set at 200 ms.

Platform		12 V	24 V	48 V	Reference temperature: 0°C
16	LIN bus	30 A	-	-	Above
		30 A	-	-	Below
07 08	CAN SAE J1939 CANopen	30 A	20 A	-	Above
		30 A	25 A	-	Below
17 18	CAN SAE J1939 CANopen	30 A	20 A	13 A	Above
		30 A	25 A	15 A	Below

Mounting guidelines

LINAK® linear actuators are quickly and easily mounted by slipping pins through the holes on each end of the units and into brackets on the machine frame and the load.

The mounting pins must be parallel to each other as shown in Figure 1. Pins, which are not parallel to each other, may cause the actuator to bend and be damaged.

The load should act along the stroke axis of the actuator since off centre loads may cause bending and lead to premature failure. See Figure below.

Make sure the mounting pins are supported in both ends. Failure to do so could shorten the life of the actuator. Also, avoid applying a skew load on the actuator.

The actuator can rotate around the pivot point in the front and rear end. If this is the case it is of high importance that the actuator is able to move freely over the full stroke length, both during the development and during daily operation. Please pay special attention to the area around the housing where parts can be trapped and cause damages to the application and actuator.

In applications with high dynamic forces LINAK recommends not to use the fully extended or retracted position over longer time, as this can damage the endstop system permanently.

Please be aware that if the LA36 is used for solar applications the actuator must be mounted with the motor housing turned upwards and the wires pointing downwards.

Mounting guidelines

- The mounting pins must have the correct dimension.
- The bolts and nuts must be made of a high quality steel grade (e.g. 10.8).
No thread on the bolt inside the back fixture or the piston rod eye.
- Bolts and nuts must be protected so there is no risk for them to fall out.
- Do not use a torque that is too high when mounting the bolts for the back fixture or the piston rod eye. This will stress the fixtures.

Please note:

The piston rod eye is only allowed to turn 0-90 degrees.

Instruction concerning the turning of the piston rod eye and inner tube:

- When mounting and taking into use, it is not permitted to make excessive turns of the piston rod eye. In cases where the eye is not positioned correctly, it is permitted to first screw the eye down to its bottom position, at a maximum torque of 2Nm (1), and thereafter a maximum 90 degrees turn outwards again (2).
- As the piston rod eye can turn freely, it is important to ensure that the eye cannot rotate if the actuator is used in a pull application. If this happens, the actuator will be pulled apart and destroyed.

Warning!

If the actuator is used for pull in an application where personal injury can occur, the following is valid:

It is the application manufacturer's responsibility to incorporate a suitable safety arrangement, which will prevent personal injury from occurring, if the actuator should fail.

Warning!

LINAK's actuators are not designed for use within the following fields:

- Offshore installations
- Nuclear power generation
- Aeroplanes and other aircraft

Stroke and built-in tolerances

Platforms		Stroke tolerance	Example for 200 mm stroke	BID tolerance	Example for 300 mm BID
00	Standard with mechanical endstop	± 2 mm	198 to 202 mm	± 2 mm	198 to 202 mm
01	Standard with power switch	$\pm 0/-4$ mm	196 to 200 mm	± 4 mm	196 to 204 mm
07 08	CAN SAE J1939 CANopen	$\pm 2/-6$ mm	194 to 200 mm	± 4 mm	196 to 204 mm
16 17 18	LIN bus CAN SAE J1939 CANopen	± 2 mm	198 to 202 mm	± 2 mm	198 to 202 mm
B3 C3 F3 0B 14 A7 A8 5E 2E 0E 14 C6 D6 E6	I/O Basic I/O Customised I/O Full IO-Link Modbus RTU CAN SAE J1939 CANopen Profinet EtherNet/IP Modbus TCP/IP Modbus RTU LIN bus Off-highway CAN SAE J1939 Off-highway CANopen Off-highway	± 2 mm	198 to 202 mm	± 2 mm	198 to 202 mm

Built-in dimensions:

All dimensions are in mm

Minimum built-in dimension is 300 mm

Keep a clearance when mounting a bracket

When mounting a custom bracket on the moving part of the actuator, please observe the minimum clearance between bracket and cylinder top when fully retracted. This will prevent jamming and destruction of the actuator drive train.

DETAIL A

For platforms with interfaces containing Zero point the minimum stroke is 70 mm

The Zero point initialisation zone is located between 35-70 mm going from the most inward position.

The movement passing the zone has to be stable for the initialisation to succeed - also no virtual limits can be set in the initialisation zone.

Built-in dimensions

All dimensions are in mm

	Back fixture						
Length of stroke		<=300	>300	<=300	>300	<=300	>300
Piston rod eye		Inner thread - from the surface		Solid or slotted fixture - to center of the hole		Outer thread - from the surface	
	Inner thread - from the surface	189	239	195	245	180	230
	Solid or slotted fixture - to center of the hole	194	244	200	250	185	235
	Outer thread - from the surface	181	231	187	237	173	223
	Ball eye - to center of the hole	209	259	215	265	200	250

LA36 with ATEX/IECEX/CCC built-in dimensions:

All dimensions are in mm

Durability for piston rod eyes and back fixtures

Blue = Full Lifetime

Grey = Reduced lifetime

(If e.g. a Male thread M12 is used with an actuator with a larger load than 2,600 N and a Slotted fixture is used with an actuator with a larger load than 4,500 N their lifetime will be shorter than if the other fixtures are chosen).

Mounting of cables

1. Unscrew the cover and remove the two blind plugs.

2. Plug in the power cable and/or the signal cable.

3. Slide the cover onto the actuator.
The torque of the cover screw is approx. 3.5 ± 0.3 Nm
TORX 25IP

When changing the cables on a LINAK® actuator, it is important that this is done carefully, in order to protect the plugs and pins. Before the new cable is mounted, we recommend that the socket is greased with vaseline, to keep the high IP protection and ensure an easy mounting. Please be sure that the plug is in the right location and fully pressed in before the cable lid is mounted.

Please note that if the cables are mounted and dismantled more than 3 times the plugs can be damaged. Therefore, we recommend that such cables are discarded and replaced.

Also note that the cables should not be used for carrying the actuator.

We recommend to take some precaution and design the wire connection in a way, where the cable end is kept inside a closed, protected area to guarantee the high IP protection.

NOT valid for ATEX cables, please refer to the ATEX section for correct cable mounting on ATEX actuators.

Mounting of cable with Off-highway

1) Plug in the cable.

An audible "Click" confirms a correct mounting

2) Secure the cable with cable-ties to the two anchors

We recommend to take some precaution and design the wire connection in a way, where the cable end is kept inside a closed, protected area to guarantee the high IP protection.

Off-highway connection to Actuator Connect™

When connecting the actuator to Actuator Connect™ it is imperative to follow these instructions.

Power supply connection:

The actuator has to be powered with 12 Volt DC

Positive is connected to pin 4 at the actuator

GND is connected to pin 11 at the actuator

RJ45:

Pin 1 at the RJ45 plug is Ground and has to be interconnected to GND on pin 11 at the actuator

Pin 6 and 8 at the RJ45 plug is communication and both has to be connected to pin 10 at the actuator:

Electrical installation:

- To ensure maximum self-locking ability, please be sure that the motor is shorted when stopped. Actuators with integrated controller provide this feature, as long as the actuator is powered.
- When using soft stop on a DC-motor, a short peak of higher voltage will be sent back towards the power supply. When selecting the power supply, it is important to make sure that it does not turn off the output when this backwards load dump occurs.

The power supply for actuators without integrated controller must be monitored externally and cut off in case of current overload. IC actuators have an integrated overcurrent protection.

Recommended fuse for actuators without Integrated Controller:

Type	Spindle pitch (mm)	Thrust max. push/pull (N)	Typical Amp. at full load (A)				Recommended fuse			
			48 V	36 V	24 V	12 V	48 V	36 V	24 V	12 V

Manual hand crank:

The manual Hand Crank can be used in the case of a power failure and is only intended for emergency use.

The cover over the Allen key socket must be unscrewed before the Allen key can be inserted and the hand crank operated.

Hand crank torque: 6-8 Nm

Hand crank rpm: Max. 65

Piston rod movement per turn:				
	8 mm	12 mm	16 mm	20 mm
Gear F	-	11 mm	14 mm	18 mm
Gear G	-	6 mm	8 mm	10 mm
Gear H	3 mm	4 mm	5 mm	7 mm
Gear E	-	-	-	27 mm

- The power supply has to be disconnected during manual operation
- If the actuator is operated as a hand crank, it must only be operated by hand, otherwise there is a potential risk of overloading and thereby damaging the actuator - do NOT use power tools for the hand crank!
- After using the hand crank, the ingress protection will be less than IP66 once the plug is removed
- After using the hand crank, always return the actuator to the most inward position. Failing to do so can damage the actuator and/or the application it is used for

The manual hand crank must NEVER be used in an ATEX/IECEX/CCC environment, as it is not possible to verify that the actuator is proper sealed when the hand crank has been used.

The actuator must NOT be used in an ATEX/IECEX/CCC environment, if the warning sticker is missing or shows sign of having been removed from the bottom of the actuator.

Label for LA36IO

Designed in Denmark

DK - 6430 Nordborg

Type : 3612025000B32B=612H30450ACS000

Item No. : J06292

Prod. Date : 2024.03.20

Max Load : Push 6800 N / Pull 6800 N IP66

Power Rate: 24 V $\overline{=}$, Max 13 A

Duty Cycle : 20% Max. 4 min/16 min

Model : LA36IO ; FCC ID: XBE-LA36IO ; IC: 12338B-LA36IO

W/O# -0001

Made in Denmark

1. **Type: 3612025000B32B=612H30450ACS000**
Describes the basic functionality of the product
2. **Item no.: J06292**
Sales and ordering code
3. **Prod. Date: YYYY.MM.DD**
Production date describes when the product has been produced. This date is the reference for warranty claims
4. **Max Load: Push 4500N / Pull 4500N IP66**
Describes the maximum load that the product can be exposed to in compression and tension.
This line also contains a reference to the product's IP protection degree
5. **Power Rate: 24VDC / Max. 13 Amp**
Input voltage for the product and maximum current consumption
6. **Duty Cycle: 20%, Max. 4 min. / 16 min.**
The duty cycle defines the maximum period during operation without interruption. After operation, a pause must be observed. It is important that the operator follows the instructions of the duty cycle; otherwise, a possible overload may result in reduced product life/errors
7. **W/O #1234567-0001**
The LINAK work order followed by a unique sequential identification number

DECLARATION OF INCORPORATION OF PARTLY COMPLETED MACHINERY

LINAK A/S
Smedevænget 8
DK - 6430 Nordborg

LINAK A/S hereby declares that LINAK DESKLINE® products, characterised by the following models and types:

Control Boxes	CBD6S
Linear Actuators	DB5, DB6, DB14, LA23, LA31
Lifting Columns	DL1A, DL2, DL4S, DL5, DL6, DL8, DL9, DL10, DL11, DL12, DL14, DL15, DL16, DL17, DL18, DL19, DL20, DL21, BASE1, LC1
Desk Panels	DPA, DPB, DPH, DPF, DPG, DPT, DP, DP1CS, DPI
Wireless Controls	BP10
Accessories	BA001, BLE2LIN, CHUSB, DESK Sensor, DF2, Kick & Click, SLS, SMPS, USB2LIN, WiFi2LIN, DC Connector, RFRL

LINAK A/S hereby declares that LINAK HOMELINE® products, characterised by the following models and types:

Control Boxes	CBD6DC
Linear Actuators	LA10, LA18, LA40 HOMELINE
Dual Actuators	TD4, TD5
Controls	BP10, HC10, HC20, HC40
Accessories	BA002, CP, BLE2DC, BLE2LIN, LED Light Rail, MD1, SMPS, WiFi2LIN

LINAK A/S hereby declares that LINAK MEDLINE® & CARELINE® products, characterised by the following models and types:

Control Boxes	CA10, CA20, CA30, CA40, CA63, CAL40, CB6, CB6S, CB6P2, CB8, CB9, CBJ2, CBJ Care, CBJ Home, CO41, CO53, CO61, CO65, CO71, COL50, OPS, PJ2, PJB4
Linear Actuators	LA20, LA23, LA24, LA27, LA28, LA29, LA30, LA31, LA34, LA40, LA44
Lifting Columns	BL1, LC1, LC3
Controls	ABL, ACC, ACK, ACO, ACOM, ACL, DP, DPH, FS, FS3, FPP, HB30, HB70, HB80, HB100, HB190, HB200, HB400, HD80, HL70, HL400
Accessories	BA16, BA18, BA19, BA22, BAJ, BAJL, BAL40, BAL50, CH01, CHJ2, CHL40, CHL50, DJB, LIN2OB, MJB2, MJB5 Plus, Massage Motor, PJB4, QLCI2, SLS, SMPS10, UBL, UBL2, UBL4 Motion, USB-A Power Adapter

LINAK A/S hereby declares that LINAK TECHLINE® products, characterised by the following models and types:

Linear Actuators	LA12, LA14, LA23, LA25, LA30, LA33, LA35, LA36, LA37, LA76, LA77
Lifting Columns	LC3 IC
Accessories	FMB

comply with the following parts of the Machinery Directive 2006/42/EC, ANNEX I, Essential health and safety requirements relating to the design and construction of machinery: 1.5.1 Electricity supply

The relevant technical documentation is compiled in accordance with part B of Annex VII and this documentation or part hereof will be transmitted by post or electronically to a reasoned request by the national authorities.

This partly completed machinery must not be put into service until the final machinery into which it is to be incorporated has been declared in conformity with the provisions of the Machinery Directive 2006/42/EC where appropriate.

Nordborg, 2024-07-10

Original declaration

ATEX/IECEx/CCC certified

LA36 can be ordered in an Ex certified version designed for installation in dust-filled atmospheres, such as grain handling facilities, cement plants, saw mills and other dusty surroundings.

Please note: The approval is for dust only, NOT for gas.

The IECEx/ATEX versions are suitable for applications in Group IIIC, Category 2D. Zone 21 and 22. Certified according to EN60079-0:2012 and EN60079-31:2014.

CE 0402		II 2D	Ex tb	IIIC	T135 °C	Db	Tamb -25 °C to + 65 °C
					Temperature class		Ambient temperature of operation
					Combustible dust - conductive*		Enclosure Zone 21
					Protection by Enclosure		
					Explosion protection		
					Category 2 equipment for dust		
					Non mining		
					Equipment for hazardous areas		
					Quality assurance notification body		

* Not a source of ignition in normal operation or when subjected to faults that may be expected, though not on a regular basis.

ATEX/IECEX/CCC certified

The ATEX/IECEX/CCC versions are suitable for applications in Group IIIC, Category 2D. E.g. Zone 21 and 22 with the following markings:

ATEX: II 2D Ex tb IIIC T135°C dB

IECEX: EX tb IIIC T135°C dB

CCC: Ex tb T135°C dB

Special conditions for use as stated in the certificates:

1. The max duty cycle specified at an ambient temperature of +25 °C.

Load 0-6800 [N]	
Stroke:	Duty cycle:
0-600 mm	20 % int. - Max. 2 [min.] continuous drive followed by 8 [min.] rest.
601-1000 mm	15 % int. - Max. 3 [min.] continuous drive followed by 19 [min.] rest.
Load 10000 [N]	
Stroke:	
0-1000 [mm]	5 % int. - Max. 1 [min.] continuous drive followed by 8 [min.] rest.

2. Ambient temperature area are specified to -25 °C...+65 °C.
3. The power supply cable is of special design fulfilling IP 6X ingress protection. The cable can be delivered in different lengths. Only cables delivered by LINAK A/S shall be mounted.
4. The connection between the actuator and the rest of the machine/device shall be conductive, and furthermore the application shall be grounded in order to remove any Electro Static Discharge. This counts for both of the actuator's fixation points (Back Fixture and Piston Rod Eye).
5. The cable is not UV-resistant and shall be protected from direct sunlight.
6. The supply has to be protected by a fuse according to the electrical data.
7. The Linear Actuator has to be installed in such a way, that highly effective potential electrostatic charges are prevented. The cleaning of the Linear Actuator shall be done only with a damp cloth.

Warning

If the following is not complied with, the ATEX/IECEX/CCC certification will not be valid:

- Actuator use must be in compliance with specification.
- If the actuator has no built-in current cut-off, one must be mounted (Please see the Max current on the type-plate placed on the actuator)
- Only ATEX/IECEX/CCC approved cables are to be used:

Cable type	No of wires in cable	LA36 ATEX/IECEX/CCC cable	Length (mm) outside actuator
Power cable	2 x 14 AWG	0367115-xxxx	1,500 / 5,000 / 10,000 mm
Signal cable	6 x 20 AWG	0367114-xxxx	1,500 / 5,000 / 10,000 mm
Signal cable	9 x 20 AWG	0367399-xxxx	1,500 / 5,000 mm

- The power supply/signal cables for the actuator must be terminated in a safe location or alternatively by use of an Ex terminal box certified for special conditions for safe use
- When mounting or if changing cables in ATEX/IECEX/CCC approved applications, the standard EN IEC 60079-19 must be respected to maintain the certification. It is crucial that a proper tightness is obtained after installing/replacing the cables, therefore the installation guideline below must be strictly followed
- The actuator is not to be opened in areas with dust, and unauthorized personnel is never to produce, modify or repair actuators in order to sustain the approval
- No changes are to be made to the actuator after delivery. This manual is part of the equipment. LINAK A/S keeps the right to modify specifications without advanced notice. Spare this manual for later use

The product may only be used if:

1. The product is used under the conditions described in the installation - and operation instruction
2. Special conditions for safe use are obtained (see above)
3. Atmospheric conditions: Pressure 80 kPa (0.8 bar) to 110 kPa (1.1 bar); and air with normal oxygen content, typically 21 % v/v
4. Safety and operation instructions are accessible and followed
5. The production of actuators require quality management systems and auditing. Therefore, only LINAK A/S is allowed to produce, modify or repair actuators in order to sustain the certification.

ATEX/IECEX/CCC**General indication of risk:**

Installation of the device shall be performed by trained staff only, familiar with the safety requirements and risks. The installation shall be according to EN IEC 60079-14 and all local safety regulations shall be complied with.

Prevent failures, protect persons against injuries and protect the device against damage.

The person responsible for the system must secure that:

- Safety and operation instructions are accessible and followed
- Local safety regulations and standards are obeyed
- Performance data and installation specifications are complied with
- Safety devices are installed correctly and recommended maintenance is performed
- National regulations for disposal of electrical equipment are obeyed

Maintenance and repair

- Repairs of the device must be carried out by LINAK® authorized persons only or by authorised repair shop fulfilled EN IEC 60079-19
- Only perform mounting as described as in this manual

During maintenance regard all safety regulations and internal operation instructions.

Mounting and replacement of ATEX cables

When mounting the necessary ATEX-approved cables on an ATEX certified LINAK actuator, it is important that this is done carefully by a competent person, in order to protect the plugs and pins -and ensuring the ingress protection of the product. Before the new cable is mounted, the socket shall be greased with Vaseline®, to maintain the high ingress protection and ensuring easy mounting. The plug shall be in the right location and fully pressed in before the cable lid is mounted.

Please note that if the cables are mounted and dismantled more than 3 times the plugs can be damaged. Therefore, such cables shall be discarded and replaced.

Also note that the actuator must not be carried in the cables.

We recommend to take some precaution and design the wire connection in a way, where the cable end is kept inside a closed, protected area to guarantee the high IP protection.

Replacing an ATEX cable

Right side: Powerplug (0363106)
 Middle: Screw (0002267)
 Left side: Signal plug (0363105)

The colour of the O-ring has to be **brown** (see picture) to be used in ATEX certified installations. O-rings with other colours, such as yellow, are not allowed.

Right side: Power cable (0367115-xxxx)
 Middle: Screw (0002267)

Left side: Signal cable (0367114-xxxx) or (0367399-xxxx)

The colour of the O-ring has to be brown (see picture) to be used in ATEX certified installations. O-rings with other colours, such as yellow, are not allowed.

Fixate the actuator.

Loosen the screw
 to disassemble the cable relief.

Remove the cable relief by pulling it in the
 actuators stroke direction.

Remove the plugs or cables.

Insert the cables (0367115-xxxx) and (0367114-xxxx or
 0367399-xxxx) with ATEX approved O-ring.

The colour of the O-ring has to be **Brown**.

Replacing an ATEX cable

Correct mounting of cables,
The brown O-ring may not be visible.

Incorrect mounting
The brown O-ring is visible
The application is NOT tight

Incorrect mounting
The brown O-ring is visible
The application is NOT tight

Place the cable relief at the top
of the outer tube and slide it all
the way down to the housing.

Place and tighten the screw (0002267).
Fasten it to $3 \text{ Nm} \pm 0,5 \text{ Nm}$

(13) SCHEDULE

(14) EU-Type Examination Certificate TÜV 15 ATEX 143747 X Issue 01

(15) Description of product

The LA36 series of linear actuators creates motion in a straight line, as contrasted with circular motion of a conventional electric motor. The actuator consists of a motor, a gearbox and a spindle that causes the actuator to either extend or retract. The motor housing consists of a two-part aluminium assembly with a cork gasket and an aluminium outer tube. The equipment is earthed externally through actuators fixation points: the piston rod eye and the back fixture. The actuators are rated for 12V, 24V or 36V d.c. with push / pull specifications up to 10000 N.

Type key:

The LA36 series of linear actuators can be delivered in different type variants in accordance with the manufacturers ordering nomenclature (below). The different type variants, which does not involve the design of the motor housing itself, has no influence on the Ex-protection principle Ex tb IIIC T135 °C Db as long as the supplied power cable are delivered by the manufacturer.

Model LA36 can furthermore be delivered with an accessory, called "Rodent protection". This variant is mounted with an external cable gland for mechanical fixing of a cable conduit, to make the power and signal cable rodent protected. This external cable gland has no influence on the Ex-protection principle and the ingress protection is still kept IP6x.

Actuator type	Spindle Pitch	Stroke length	Safety	Feedback	Platform	Motor type	IP degree		Colour	Back fixture	Piston rod eye	Gear	Brake	BID	Fire category	Plug type	Cable	Safety factor	Not specified	Not used
36	***	***	*	*	**	*	*	-	*	*	*	*	*	****	*	*	*	*	*	

The actuators are certified under the type LA36 including various type variants which has no influence on the ingress protection / Ex-protection principle. The manufacturers "Scheduled Drawings" specify the fixed part of the construction.

Electrical data:

Supply (brown and blue)

Type 1 $U_n = 12 \text{ V d.c.} + 20\%$
 $I_n = 22 \text{ A}$

Type 2 $U_N = 24 \text{ V d.c.} + 10\%$
 $I_n = 11 \text{ A}$

Type 3 $U_n = 36 \text{ V d.c.} + 10\%$
 $I_n = 8 \text{ A}$

Signal Power supply (red and black)

$U_n = 12 - 24 \text{ V d.c.}$
 $I_n = 40 \text{ mA}$

Schedule to EU-Type Examination Certificate TÜV 15 ATEX 143747 X Issue 01

Thermal data:

The permissible ambient temperature range during operation is -25 °C ... +65 °C.

(16) Drawings and documents are listed in the ATEX Assessment Report No. 24 203 369426.

(17) Specific Conditions for Use

1. The max duty cycle specified at an ambient of +25 °C.

LOAD 0-6800 [N]	
STROKE	DUTY CYCLE
0-600 [mm]	20% int. - Max. 2 [min.] continuous drive followed by 8 [min.] rest.
600-1000 [mm]	15% int. - Max. 3 [min.] continuous drive followed by 17 [min.] rest.

LOAD 10000 [N]	
STROKE	DUTY CYCLE
0-1000 [mm]	5% int. - Max. 1 [min.] continuous drive followed by 19 [min.] rest.

2. Ambient temperature area is specified to -25 °C ... +65 °C.
3. The power supply cable is of special design fulfilling IP 6X ingress protection. The cable can be delivered in different lengths. Only cables delivered by Linak shall be mounted.
4. The connection between the actuator and the rest of the machine/device shall be conductive, and furthermore the application shall be grounded in order to remove any Electrostatic Discharge. This counts for both of the actuator's fixation points (Back Fixture and Piston Rod Eye).
5. The cable is not UV-resistant and shall be protected from direct sunlight.
6. The supply has to be protected by a fuse according to the electrical data.
7. The Linear Actuator has to be installed in such a way, that highly effective potential electrostatic charges are prevented. The cleaning of the Linear Actuator shall be done only with a damp cloth.

EQUIPMENT:

Equipment and systems covered by this Certificate are as follows:

The LA36 series of linear actuators creates motion in a straight line, as contrasted with circular motion of a conventional electric motor. The actuator consists of a motor, a gearbox and a spindle that causes the actuator to either extend or retract. The motor housing consists of a two-part aluminium assembly with a cork gasket and an aluminium outer tube. The equipment is earthed externally through actuators fixation points: the piston rod eye and the back fixture. The actuators are rated for 12V, 24V or 36V d.c. with push / pull specifications up to 10000 N.

Model LA36 can furthermore be delivered with an accessory, called "Rodent protection". This variant is mounted with an external cable gland for mechanical fixing of a cable conduit, to make the power and signal cable rodent protected. This external cable gland has no influence on the Ex-protection principle and the ingress protection is still kept IP6x.

The actuators are certified under the type LA36 including various type variants which has no influence on the ingress protection / Ex-protection principle. The manufacturers "Scheduled Drawings" specify the fixed part of the construction.

Supply (brown and blue)

Type 1	U_n	=	12	V d.c.	$\pm 20\%$
	I_n	=	22	A	

Type 2	U_n	=	24	V d.c.	$\pm 10\%$
	I_n	=	11		

Type 3	U_n	=	36	V d.c.	$\pm 10\%$
	I_n	=	8	A	

Signal Power supply (red and black)

U_n	=	12 - 24	V d.c.
I_n	=	40	mA

SPECIFIC CONDITIONS OF USE: YES as shown below:

1. The max. duty cycle is specified as follows at an ambient temperature of +25 °C:

LOAD 0-6800 [N]	
STROKE	DUTY CYCLE
0-600 [mm]	20% int. - Max. 2 [min.] continuous drive followed by 8 [min.] rest.
600-1000 [mm]	15% int. - Max. 3 [min.] continuous drive followed by 17 [min.] rest.

LOAD 10000 [N]	
STROKE	DUTY CYCLE
0-1000 [mm]	5% int. - Max. 1 [min.] continuous drive followed by 19 [min.] rest.

2. Ambient temperature area is specified to -25 °C to + 65 °C

3. The power supply cable is of special design fulfilling IP 6X ingress protection. The cable can be delivered in different lengths. Only cables delivered by LINAK A/S must be mounted.

LOAD 10000 [N]	
STROKE	DUTY CYCLE
0-1000 [mm]	5% int. - Max. 1 [min.] continuous drive followed by 19 [min.] rest.

2. Ambient temperature area is specified to -25 °C ... +65 °C.
3. The power supply cable is of special design fulfilling IP 6X ingress protection. The cable can be delivered in different lengths. Only cables delivered by Linak shall be mounted.
4. The connection between the actuator and the rest of the machine/device shall be conductive, and furthermore the application shall be grounded in order to remove any Electro Static Discharge. This counts for both of the actuator's fixation points (Back Fixture and Piston Rod Eye).

TÜV NORD CERT GmbH
Hannover Office
Am TÜV 1
30519 Hannover
Germany

Page 3 of 3
Attachment to IECEx TUN 14.0021X issue No.: 02

5. The cable is not UV-resistant and shall be protected from direct sunlight.
6. The supply has to be protected by a fuse according to the electrical data.
7. The Linear Actuator has to be installed in such a way, that highly effective potential electrostatic charges are prevented. The cleaning of the Linear Actuator shall be done only with a damp cloth.

CERTIFICATE FOR CHINA COMPULSORY PRODUCT CERTIFICATION

No.: 2021312307000228

Applicant	LINAK (SHENZHEN) ACTUATOR SYSTEMS LTD.
Address	Block B, Shanghe Industrial Park, Nanchang Road, Xixiang Street, Bao'an District, Shenzhen
Manufacturer	Linak A/S
Address	Smedevænget 8, Guderup, 6430 Nordborg, Denmark
Production Factory	Linak A/S
Production Address	Smedevænget 8, Guderup, 6430 Nordborg, Denmark
Product	Actuator
Model/Type	36XXX XXX X X XX X T - X X X X X XXXX X X X X X
Ex marking	Ex tb IIIC T135°C Db
Reference Standards	GB/T3836.1-2021, GB/T3836.31-2021

Certification mode Type Test + Initial Factory Inspection + Post-Certification Surveillance

The product(s) is verified and certified according to CNCA-C23-01: 2019 China Compulsory Certification Implementation Rule on Explosion Protected Electrical Product and CNEX-C2301-2019 Guideline of China Compulsory Certification Implementation Rule on Explosion Protected Electrical Product.

See Annex for the detailed product information (6 pages).

Initial issue date: 2022-01-13

Issued date: 2023-01-13

Valid to: 2027-01-12

The validity of this certificate is maintained through the regular supervision of the issuing authority during the validity period.

Where any discrepancy arises between the English translation and the original Chinese version, the Chinese version shall prevail.

Signal Power supply (red and black)	
$U_n = 12 - 24\text{VDC}$	$I_n = 40\text{mA}$

Ex marking: Ex tb IIIC T135°C Db

- Producers should organize production in accordance with the technical documents approved by the certification body.

2. Specific conditions of safety use:

- Ingress protection: IP6X.
- Ambient temperature range is specified to -25°C to $+65^{\circ}\text{C}$.
- The max. duty cycle is specified as follows at an ambient temperature of $+25^{\circ}\text{C}$:

LOAD 0-6800N	
STROKE	DUTY CYCLE
0-600mm	20% int. - Max. 2 [min.] continuous drive followed by 8 [min.] rest.
600-1000mm	15% int. - Max. 3 [min.] continuous drive followed by 17 [min.] rest.

LOAD 10000N	
STROKE	DUTY CYCLE
0-1000mm	5% int. - Max. 1 [min.] continuous drive followed by 19 [min.] rest.

- The power supply cable is of special design fulfilling IP 6X ingress protection. The cable can be delivered in different lengths. Only cables delivered by LINAK A/S shall be mounted.
- The connection between the actuator and the fixing points must be conductive and furthermore the application must be grounded in order to remove any electrostatic charge. This relates to both the fixing point on the motor housing and the point on the piston rod.
- The supply cable must be protected against UV-light.
- The supply must be protected by a fuse according to the electrical data.
