Chamber Information

•SATIMO SG-24L Multi-Probe Antenna Measurement System

- Angle between probes: 15°
- Frequency range: 400 MHz – 8.5 GHz
- Chamber Room Size: 5m L x 5m W x 5m H

Test Setup for S-parameter Measurement

Step 1

Configure the Network Analyzer

- Turn on the network analyzer
- Perform initialization
- Setting the appropriate frequency range and measurement parameters.

Step 2

Calibrate the Network

- Before starting the test, calibrate to eliminate the inherent response of the test system.
- Perform full open, full short, and full load calibration, as well as calibration of the reference plane.

Step 3

Set the Test Parameters

- Set the desired test parameters on the network analyzer. This typically includes selecting the desired S-parameter type (e.g., S11, S21, etc.), frequency range, and power level.

Step 4

Connect the Antenna

- Properly connect the antenna to the test port of the network analyzer.
- Ensure a secure connection and use suitable adapters and cables to minimize signal loss.

Step 5

Perform the Test

- Begin the S-parameter test of the antenna. This will measure the reflection and transmission characteristics of the antenna within the selected frequency range.

Step 6

Record the Results

- Once the test is completed, record the measurement results. These results are usually presented in the form of graphs or tables for further analysis and comparison.

Test Setup for Radiation Pattern Measurement

Step 1

- Fix the whole antenna unit on the pole in the center of the anechoic chamber.

Step 2

- The whole antenna unit is connected with the coaxial line at the transmitter end of the microwave anechoic chamber.

Step 3

- Close the microwave anechoic chamber door, so that the external signal can not enter the anechoic chamber interior, and then start testing.

Step 4

- Open SG 24L the antenna measurement system, can observe the selected frequency, selected angle of the system real-time testing.

Step 5

- After testing, Wave Studio can carry on near and far field data conversion.
