

CC compliance Statements

This device complies with Part 15 of the FCC Rules. This device operates subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential area. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used properly, it may cause harmful interference to radio communications. However, testing has shown that this interference will not occur in a typical installation.

Caution: Changes or modifications not approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment does cause harmful interference to radio communications when it is not properly installed and used. The following instructions are intended to help you minimize such interference and, if necessary, help you correct the interference by one or more of the following actions:

- Reorient or relocate the receiving antenna.
- Increase the distance between the equipment and the receiver.
- Plug the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
