

To Whom It May Concern

Subject: Differences Between Products BRD21-OTBR and BRD21-OTME

Applicant: MMB Research Inc.
FCC ID: XFF-BRD21

Dear Sir/Madam,

We hereby certify that the two product variants marketed as **BRD21-OTBR** and **BRD21-OTME** have *exactly the same* PCBA layout, RF design, RF performance, and antenna type.

The differences between the 2 product variants are as follows:

- **BRD21-OTBR** has its Ethernet interface enabled by firmware, while
- **BRD21-OTME** has its Ethernet interface disabled by firmware
- Various other differences in firmware functionality

The above differences are not related to the RF Design or RF performance of the products. Given that **BRD21-OTBR** supports the additional Ethernet interface, this model was selected as the worst-case test sample.
