To Whom It May Concern

Subject: **Product Variants Attestation**

FCC ID: **XFF-DTX01**

We would like to request product variant certification for the following models:

- DTX01PA10-CHP
- DTX01PA10-RFC

Whereby -CHP refers to a module with a chip antenna and -RFC refers to a module with a U.FL connector. The modules are electrically identical and have the same RF characteristics. The -RFC variant allows the use of an external antenna whereas the -CHP variant does not allow the use of an external antenna. The -RFC variant will produce worst case test results and can be used for testing which is representative of the performance of the other model.
