Product Name: CT3601 Mobile Tracking Device

Subject: Tune-up procedure/requirement

To Whom it May Concern,

The CT3601 Bluetooth modem radio frequency(RF) parameters are tested and tuned during factory production such that there is no requirement of additional tuning by the installer or integrator. Additionally, the terminal is protected by unique password after production to prevent RF parameters from being changed.

The CT3601 device's cellular radio is OEM modems from OEM manufacturer. All RF parameters are pre-set and tested at OEM manufacturers. No tuning up is required.

Sincerely,

Xinming Wang
