6. MAXIMUM OUTPUT POWER

Standards: FCC PART 15 : 2013
RSS-210 Issue 8 : 2010

Sections: 15.407 a) (1); (2); (3)
Annex 9.2 (1); (2); (3) of RSS-210

Test configuration:

The system is tested in an open area test site (OATS).

The test unit is placed on a rotating table, 0.8 m from a ground plane. Zero degree azimuth corresponds to the front of the equipment under test.

The level was maximised in antenna height, azimuth and polarization. The maximum level measured on the spectrum analyser was recorded.

Test procedure:

789033 D01 General UNII test Procedures v01r03 method SA-3

Distance of antenna: 3 meters

Instrumentation test list:
