Title:

e-mail: jean.hu@quectel.com

Change Contents:

[FGS060N(Variant) and FGS060N(Original) both use NXP IW612UK/A1IZ chipset, share the same chipset baseline, but in the software and hardware fields, there is only one difference in the usage of GPIO. the difference is FGS060N(Variant) LGA Module D1 PIN is LE_AUDIO, but the PIN D1 ON FGS060(Original) LGA MODULE is Reversed.
This changes the antenna, Applicant address, Manufacturer address and Brand name.]

Sincerely,

[Signature]
