RE: Modular Approval Request for Model: FME163R

FCC ID: XMR2026FME163R

The following attestation addresses the requirements to support modular approval:

Modular approval requirement	Yes	No *
(i) The radio elements of the modular transmitter must have their own shielding. The physical crystal and tuning capacitors may be located external to the shielded radio elements.	Yes, Shielding is provided by a metal cover the RF circuitry.	
(ii) The modular transmitter must have buffered modulation/data inputs (if such inputs are provided) to ensure that the module will comply with part 15 requirements under conditions of excessive data rates or over-modulation.	Yes, all modulation and data inputs are buffered by circuitry on the transmitter chip.	
(iii) The modular transmitter must have its own power supply regulation.	Yes, Power supply regulation is provided by circuitry on the transmitter chip.	
(iv) The modular transmitter must comply with the antenna and transmission system requirements of §§ 15.203, 15.204(b) and 15.204(c). The antenna must either be permanently attached or employ a "unique" antenna coupler (at all connections between the module and the antenna, including the cable).	Yes, the antenna is employ a "unique" antenna coupler (at all connections between the module and the antenna, including the cable).	
(v) The module must demonstrate compliance in a stand-alone configuration.	Yes, testing was performed with the module on a special extender board, as shown in the test setup photos.	
(vi) The modular transmitter must be equipped with either a permanently affixed label or must be capable of electronically displaying its FCC identification number.	Yes, a sample of the host label is provided as an exhibit, showing the FCC ID of the module.	
(vii) The modular transmitter must comply with any specific rules or operating requirements that ordinarily apply to a complete transmitter and the manufacturer must provide adequate instructions along with the module to explain any such requirements.	Yes, the modular transmitter complies with part 15 as demonstrated in the test report exhibit.	
(viii) The modular transmitter must comply with any applicable RF exposure requirements	Yes, the modular transmitter complies with RF exposure requirements as demonstrated in the RF exposure information exhibit.	

* Please provide a detailed explanation if the answer is "No."

Yours sincerely,

(Signature)
