

EXHIBIT 4 - TEST SETUP PHOTOGRAPHS

**Conducted Emission
Test Setup**

**Radiation Emission Test
Setup (Below 30MHz)**

Radiation Emission Test Setup (30MHz to 1GHz)	 A photograph of a radiation emission test chamber. The walls are covered with white absorber panels featuring black cross patterns. A white table is positioned in the center, with a black monitor on top. Blue and white striped safety tape is used to mark the floor area around the table. A white metal frame is visible on the left side of the table.
Radiation Emission Test Setup (1GHz to 18GHz)	 A photograph of a radiation emission test chamber, similar to the one above but for a higher frequency range. The walls are covered with white absorber panels featuring black cross patterns. A white table is positioned in the center, with a black monitor on top. A red and white striped safety tape is used to mark the floor area around the table. A white metal frame is visible on the left side of the table. In the foreground, a black cylindrical object, likely a probe or antenna, is visible.

**Radiation Emission Test
Setup (Above 18GHz)**
