

EXHIBIT 4 - TEST SETUP PHOTOGRAPHS

Conducted Emission Test Setup	 A photograph showing a conducted emission test setup. A television set is placed on a wooden table, displaying a color calibration chart with vertical bars of white, yellow, cyan, magenta, red, and blue. To the left of the table, a piece of electronic equipment, likely a spectrum analyzer or a noise meter, is connected to the TV via a cable. The background is a plain wall with a power outlet.
Radiation Emission Test Setup (Below 30MHz)	 A photograph showing a radiation emission test setup. A television set is placed on a white stand in the center of a room. The walls are covered with white, rectangular, reflective panels arranged in a grid pattern. In the foreground, there is a metal frame structure, possibly for a probe or a sensor, positioned over a small table. The floor is polished and reflects the light from the TV screen.

Radiation Emission Test Setup (30MHz to 1GHz)

Radiation Emission Test Setup (1GHz to 18GHz)

**Radiation Emission Test
Setup (Above 18GHz)**
