Indoor Client and Access Point Cover Letter FCC 5.9 GHz Declaration

Company name: u-blox AG

FCC ID: XPYJODYW6A

FCC Part 15 Certification

To whom it may concern:

We, u-blox AG, hereby attest that this device under FCC ID: XPYJODYW6A complies with device protocol requirements and operational restrictions for indoor device clients and low power indoor access point.

Indoor Clients

1. Client device (EUT) will not directly connect to another client device.
2. Client device (EUT) will only associate and connect with an indoor Access Point (AP) or indoor Subordinate.
3. Client device (EUT) will always be under the control of an indoor AP. However, there may exist situation where the client may transmit brief messages, prior to being under the control of an AP, to join an AP network. But these brief messages will only occur if the client has detected a signal confirmed that an AP is operating on a particular channel. These brief messages will have a time-out mechanism if the client does not receive a response from an AP.
4. Clients cannot have a direct connection to the internet to source the internet to other clients, access points, subordinates or clients from a wired or direct connection.

Indoor Access Points

1. Supplied power from a wired connection and has no batteries.
2. Indoor installation only.
3. Must use an integrated antenna

Sincerely,

u-blox AG
Zürcherstrasse 68
8800 Thalwil
Switzerland
