Table 1

This request is to approve the change of Firmware Version Identification Number to FVIN 01.

The proposed change is introduced with the intention to activate the U-NII 4 channels with use of Configuration file.

No other hardware or software changes are applicable.

The proposed change does not affect the RF performance of the MAYA-W2 modules on the Wi-Fi 2.4 GHz and 5GHz bands that was already tested and certified.

For the additional channels of U-NII 4, testing have been conducted to prove the compliance with FCC regulation.

Thank you for your attention in this matter.

Sincerely,

Filip Kruzela

Certification Manager, u-blox AG
